## VISION

Istanbul Aydın University adopts as its policy excellence in higher education.

The vision of Istanbul Aydın University is to be a leading higher education institution where sustainable innovations are brought to life and where individuals educated in degree and training programmes, which are subject to continuous change in accordance with the contemporary changes of our era, can transform knowledge into product to the benefit of mankind.

## MISSION

The mission statements of İstanbul Aydın University are,

To be an institution where the proper infrastructure with up to date technology is used in both education and research of high standards and hence paving the way to rapid transformation of knowledge to product and where the community and mankind at large are served by conducting high level basic/applied/interdisciplinary research and by providing excellent education in world standards,

To provide education at all levels of higher education defined in the Bologna Process using the basic concepts of Bologna Process and to be a center of attraction both for faculty and students at an international level,

To collaborate with the academic world, business sectors and NGO's nationally and internationally and motivate the community for life long learning,

To have a campus with all the facilities to house students of different cultures and nationalities and prepare the students for a world of global competition and cultural differences while being in realization of their individual differences.

## HISTORY

Istanbul Aydın University is the first foundation vocational school of Istanbul founded in 2003 as Anadolu BİL Vocational School directly depending on the Board of higher education with the aim of training a qualified labor force sought after on the national and international level by the Education and Cultural Foundation of Anatolia (AKEV). In 2007, by completing its establishment, Istanbul Aydın University took its place in higher education with eight faculties, one graduate school, two vocational schools and two institutes.

Istanbul Aydın University is still active at its Florya and Bahçelievler Campuses in a wide range of disciplines with a modern education environment to train the labor force that our era requires. In some of its departments the educational language is English. It consists of equipped and experienced instructors with the strongest academic and professional knowledge in Turkey.

The principle of Istanbul Aydın University is to educate its students as a leader, a big wheel equipped with contemporary values who have gained the ability to think critically and ethically towards self-improvement.

Istanbul Aydın University is increasing the emphasis on personal development and professional skills in addition to academic education and tries to prepare its students to be fully equipped for the world of the future by close cooperation with sectors, hands-on training, international relations, and the supporting of certificate programs within the scope of international diploma programs.

*Istanbul Aydın University Graduation Ceremony, 2010-2011*

from the **PRESIDENT**

**Dr. Mustafa AYDIN**  
President

## Dear Youth,

Today's world demands manpower that can give a response to the expectations of the community is needs, dominated by the use of information and technologies, that can use at least one foreign language in business life, and that researches ,examines and produces; that renews itself in every field in addition to the information necessary for life, that is participatory and that can think to a universal extent independently when working.

Considering the needs of our age, we have implemented the foundation of a foundation vocational school, which is the first in our country to provide higher education opportunities for high school graduates or equivalent, to train the highly qualified manpower needed by our country and to contribute to the formation of trained human resources.

With its specialist teaching staff, privileged, contemporary and constantly updated programs, preparatory training program of professional foreign languages applied for the first time in Turkey, modern technical equipment, ergonomic physical structure, unlimited freedom of learning providing elegant solutions ,and its rich social structure ,Istanbul Aydın University is an institution of higher education that will provide you with the information required by the 21st century with its entrepreneurial and creative spirit.

I strongly believe that on your shoulders, modern Turkey will rise to be a leading country in science, intellect, technology and world politics. I wish our students will have their favorite profession and to plan their careers in this way and say hello to the happy future.

Now we are working non-stop for the realization of these wishes at Istanbul Aydın University, which has adopted the mission of being a model of the contemporary world and that we believe to have an important role in the development of the country.

While our university is maintaining the education of younger generations who will assimilate the values that are indispensable and unchangeable, it has taken the vision of becoming an entrepreneurial university as a duty and responsibility.

We firmly believe that Istanbul Aydın University will educate individuals who have self-development opportunities in the international structure and privileged qualifications, who will represent our country in the best way on the global platform, raise our country to the level of leading countries by moving in the light of the principles and revolutions of our great leader. We believe that the journey in modernization of our country will accelerate only by education.

## from the **RECTOR**

The main driving force in the development of the community is education. There is no developed country that has not solved the problem of development with education before. Communities of uneducated people struggle with dark thoughts which are outdated, based on no specific data and which have no logical explanation. They do not see the danger coming from inside and outside during this struggle. And in a short time, they will be the colony, satellite, and source of livelihood for developed and powerful states.

The most important source is to use our collective mind to develop. The resource for that is information. Namely, it is education. Universities are where education is represented at the highest level. While describing a university, it is listed as;

- To train manpower in the branches and numbers needed by the country,
- To disseminate enlightening scientific data by verbal, written and other means,
- To offer solutions for training professionals,
- To produce new education technologies,
- To develop education and training principles.

All these are duties given to the universities determined as a higher education institution by law. For that reason, universities are reputable organizations including managers, researchers and scientists nested with every

sector of society, focused on solving the problems of society, integrated with the world developing technologies and at the same time bringing these technologies to the country, carrying on their studies with free and independent contemporary thought, suffering from discomfort of community thinking precisely, sensitively, unselfishly and positively.

The increasing number of universities, its spreading throughout the country, the expectations of young people who want to go to university are important criteria of the cultural development of a society. Every year, over one million young people longing for a education, return from the gates of universities.

With these thoughts and this awareness, Istanbul Aydın University is a university having vision and mission, reaching its targets. With its academicians, administrators and managers, determined to be a world class university of the future as a road map. It has performed the duties promised to the community with Anadolu BİL Vocational School, has exceeded its goals, has gained the confidence of our people and students for eight years. Our target is to increase this confidence with the faculties, colleges and institutions of Istanbul Aydın University.

*Istanbul Aydın University Graduation Ceremony*

## OUR INTERNATIONAL COLLABORATIONS

#### **EUROPE INTERNATIONAL EDUCATION UNION- EAIE**

Istanbul Aydın University carries out common studies with member higher education institutes.

#### **MEDITERRANEAN UNIVERSITIES UNION- UNIMED**

Istanbul Aydın University has collaborative studies with member higher education institutes through the aims of UNIMED. In a partnership which is built especially for project studies in the European Union, there is a close collaboration between UNIMED member universities and IAU.

#### **RAMUALDO DEL BIANCO FOUNDATION, FLORANCE, ITALY**

Istanbul Aydın University is the member of the foundation which brings students, academicians and professionals from different countries and cultures together in cultural activities.

#### **COMMITTEE OF EUROPE AND MEDITERRANEAN LOCAL AND REGIONAL MANAGEMENT COOPERATION-COPPEM**

COPPEM, which has been established between municipalities of countries in Europe and the Mediterranean catchment area and other local governments with the aim of building common and sustainable solution suggestions and contributing to shared cultural values, has hundreds of members from 35 countries. This committee, whose Turkey representative is İstanbul Aydın University, makes various attempts on using administrative, political, cultural, historical, technological, educational and human experiences to good account with the commission which has expertise in 5 different areas.

#### **TRENTINA DELLA COOPERATIVE, ITALY**

European Union Lifetime Learning Program Leonardo Da Vinci Innovation Transfer "SKILLS" Project Partnership.

#### **GENT UNIVERSITY EARTH PHYSICS LABORATORY, GENT, BELGIUM**

We are collaborating in a research partnership which is about Turkey actual erosion risk analysis.

#### **EURASIA UNIVERSITIES UNION – EURAS**

The union has been founded by gathering universities from 7 different countries under the leadership of İstanbul Aydın University, with the aim of developing and generalizing academic collaboration globally in Europe and Asia. EURAS, which has increased the number of its members to 50 in such a short time, has mutual exchange programs in the interest of students and academicians of member universities besides running international scientific and cultural projects.

#### **BLACKSEA UNIVERSITIES NET - BSUN**

Blacksea Universities Net has been founded with the aim of cooperating in the education, science, and culture fields and generating exchange programs between universities which are involved in the Blacksea Economic Collaboration. It works through common targets with the Blacksea Economic Collaboration Organization and the Parliamentary Assembly of Blacksea Economic Cooperation. İstanbul Aydın University associates with BSUN in local and EU projects.

#### **INTERNATIONAL MUNICIPAL DEVELOPMENT ASSOCIATION, INTA, LAHEY, HOLLAND**

An association has been formed between INTA and IAU with the aim of organizing common education programs, seminars, conferences and workshops, generating a databank for researchers, and contributing academically in municipal development and environmental project planning, supporting the union's actions in Turkey in terms of organization.

#### **ENVIRONMENT FRIENDLY TECHNOLOGIES (ATQ)**

Project associations have been formed between IAU Energy Markets and the Policies Research Center and ATQ with the aim of generalizing energy sources, particularly solar and wind energy, which are renewable and protect the environment.

#### **UNITED NATIONS HIGH COMMISSIONER FOR REFUGEES - BMMYK (UNCHR)**

An association has been formed in fields such as providing internships for college students, education of refugees and their children, and providing conference places and materials for UNCHR meetings.

#### **UNITED NATIONS GLOBAL COMPACT - UN GLOBAL COMPACT**

An association has been formed with the aim of joining projects in which universities and non-governmental organizations are included by involving United Nations Global Compact.

#### **VIENNA ECONOMIC FORUM - VEF**

An association has been formed with this forum which has been founded with the aim of supporting entrepreneurship and promoting economic investments in the countries of the region from the Adriatic to Caucasians, in fields such as job possibilities for our students and generating partnerships in projects.

“...an international  
university which believes in a bright future”

Istanbul Aydın University provides international diplomas not only in bachelor's degrees but also in associate degrees. With this purpose, it provides its students with double diplomas with two universities, one in the USA and the other one in England.

*Student potential which integrates with the world*

## OUR INTERNATIONAL COLLABORATIONS IN EDUCATION

**UC DAVIS**

### Uc Davis, USA

#### Bachelor's Degree Completion, Masters Degree, Phd

Istanbul Aydın University adds another institute to its collaborations with USA, which is with the worldwide known California Davis University. UC Davis has proved itself all over the world with the quality of its graduates and students and remains the highest ranked in university rankings for many years. University of California Davis, in addition to more than 100 undergraduate programs, offers more than 200 graduate and Phd programs. A scientific co-operation agreement has been signed between Istanbul Aydın University and the University of California Davis in the language school, student exchanges, undergraduate completion, conducting common scientific researches (except Masters and Phd areas). Bilateral agreements have been made in the "Food Safety and Organic Farming" fields between UC Davis University, which is first ranked in the world in the field of agricultural education, and Istanbul Aydın University. With these agreements, UC Davis University will provide support in the establishment of Food Safety and Organic Agriculture Research and Development laboratories at the new settlement campus of Istanbul Aydın University in Silivri. Besides, Istanbul Aydın University students will attend summer school programs at Davis to improve their English level. University of California Davis has an existing agreement with METU within the field of engineering in Turkey as well as Istanbul Aydın University and it incorporates a large number of Turkish faculty members and Phd students.

the Board of Accreditation and it is a member of the "Yellow Ribbon" which is one of the most important U.S. supported education projects in funding tuition fees. It is among the first universities in New York State which give Honor Utilities; on-line degree programs are known for excellence by the Sloan Consortium.

**MERCY COLLEGE**  
Dobbs Ferry, New York

### Mercy College, USA Undergraduate Completion, Masters Degree

Istanbul Aydın University has added Mercy College to its portfolio of international cooperation with a special agreement which provides students the chance of completing bachelor's and masters in all fields. Mercy College is a private university founded in 1950 in New York City, with over 90 different bachelor's degree programs, and is a well-established institution. U.S. Central States has the approval of

## INTERNATIONAL BACHELOR'S DEGREE, ASSOCIATE DEGREE AND BACHELOR'S DEGREE COMPLETION PROGRAMS

Besides studies, research projects, joint seminars, collaborations such as student and scholar exchanges that Istanbul Aydın University has launched in accordance with the goal of taking a place in a universal education platform, the university is developing rapidly with academic projects intended for students' gaining experience in global education and international diplomas and certificates. In addition to these, foreign language training, particularly in English, has been conducted with programs under the management of The School of Foreign Languages and it aims to bring students to the level where they can take the TOEFL certificate which has international validity.

Because of undergraduate completion and academic program partnerships such as the double degree, the IAU curriculum is accredited in international platforms in terms of supplying global education and global quality assurance. Hence, an important step has been reached on the road to internationalization which is the basic vision of our university. IAU has launched a double degree program in three different areas as a result of continuing cooperation with elite higher education institutions in the United Kingdom and the United States. The next academic year, these three programs will be started at graduate, undergraduate and postgraduate levels which will be for the benefit of our students.

## INTERNATIONAL BACHELOR'S DEGREE PROGRAMS (Double Diploma Programs 2+2)

**University of Maryland  
 University College (UMUC), USA**  
**Business Administration**

### Double Diploma Bachelor's Degree Program

Beginning from the 2009-2010 academic year, the project which entered into force with the approval of the Council of Higher Education and that was completed with the University of Maryland University College (UMUC), a respected institution of the United States, is the most important international learning opportunity offered to our student candidates. In the Bachelor's of Business Administration program, a learning opportunity which does not exist in any other university, has been created for IAU students and graduation with an international diploma without having to go abroad has been made possible for the first time under the umbrella of the university.

Courses under the program are given by both of the faculty members at IAU university campus, and successful students graduate with two separate diplomas, one from IAU and one from UMUC.

## Middlesex University London, England Political Sciences and International Relations Double Diploma Bachelor's Degree Program

Political Science and International Relations is an area which is always open to development and one of the most popular areas of our age in terms of both academic and professional life, is gaining concrete international initiative with this project from IAU. Students will travel to London for the final year of the program after completing the first three years in IAU and will take their double diplomas as graduates of Middlesex University. Admission to the program will start in the next academic year.

The purpose of the program is to make students take advantage of elements of global education and prepare their future with a different perspective and a multicultural quality within a four-year period of study. In addition, with combination of curricula, by taking a portion rather than the entire duration of study abroad, a financially rare advantage has been presented to students and their families.

30% of students in Middlesex are international students. As a university which established the first recorded open network to the world in England in 1995, it was awarded the Queen's Award for Enterprise. Besides this, it has a certificate of achievement from the QAA (Quality Assurance Agency), because of its efforts in promoting the development of students.

## INTERNATIONAL ASSOCIATE PROGRAMS (Double Diploma Programs 1+1)

Istanbul Aydın University Anadolu BİL Vocational School has launched two different double diploma programs with partners in the USA and England. The common purpose of these programs is to acquire student professions in international knowledge and experience, enhance personal development in an international environment, ensuring they are one step ahead in terms of employment opportunities, and to provide a professional level of English learning. All of these are to be provided to students by courtesy of our special agreements, with appropriate fees special for ABMYO.

**Howard Community College,  
USA Radio Television Programming  
Double Diploma Program**

This project, which provides the opportunity of receiving two diplomas at graduation by studying at Howard CC after completing the first year at Aydın University, began in the 2010-2011 academic year. Being in the USA for one year, where the media sector is progressing in giant leaps both technologically and professionally, in an academic and professional environment provides great advantage for the students.

This venture, as well as providing the chance of having an international diploma for all students, is a great opportunity for those who aim to receive education in a foreign language and develop their careers in the international field.

**Hackney Community College, England  
Computer Programming Double  
Diploma Program**

Istanbul Aydın University Professional School of Higher Education has started a double diploma program with this long-standing international educational institution of England, Hackney Community College, in the area of Computer Programming. The students of this program, which first accepted students in the 2010-

2011 academic year, will study for the first year at IAU and go to London in the second year and be students at Hackney CC and graduate from there. One of the important privileges provided to our students with this cooperation is that the program has been approved by the Edexcel Accreditation Council.

Graduates, in addition to the two college diplomas, also will be eligible to receive an Edexcel Certificate. This certificate, in addition to provide a priority place in finding a job for graduates who wish to participate in professional life, will also open doors to so many universities in the UK, Europe, Australia, Canada and the United States for those who wish to continue their academic careers.

**INTERNATIONAL BACHELOR'S DEGREE  
COMPLETION PROGRAMS  
(Bachelor's Degree Compilation Programs)**

**Middlesex University  
London, England  
Applied English-Turkish  
Translation Bachelor's  
Degree Completion Program**

It is an academic project in which IAU Anadolu BIL Vocational School graduates will be able to complete a bachelor's degree and have a diploma from Middlesex University if they wish. Following an agreement with Middlesex, Anadolu BIL Applied English-Turkish Translation Vocational School students who join the associate's degree program, can go to London and receive a bachelor's degree diploma under special conditions applied only to IAU.

**University of Greenwich,  
London, England  
International Business  
Administration  
Bachelor's Degree Completion Program**

Students who received associate's degree from the International Trade and Logistics programs of IAU Anadolu BIL Vocational School, can receive a bachelor's degree diploma in International Business Administration from the University of Greenwich by continuing their education in London under special conditions applied to IAU.

# OUR INTERNATIONAL SUMMER SCHOOL PARTNERS

Istanbul Aydın University and the University of California Berkeley, which is among the best 10 universities in the world, have signed a cooperation agreement on summer schools in all academic programs.

With 36.000 students, UC Berkeley offers just 1200 students from all over the world this summer school opportunity. The applications for this summer school for this limited quota from our country are conducted by Istanbul Aydın University. Thanks to this cooperation, which is a big service for our country and higher education students, they are offered a chance to get education, even it is short term, from one of the most prestigious universities. The students

who get this summer school opportunity will be able to add this experience which meets expectations of the business world when they begin their professional work life.

Volunteer students from all the universities in Turkey who want to get information about the UC Berkeley summer programs and the cooperation with Istanbul Aydın University may contact the Coordinatorship of International Academic Relations and Projects and can also get full information from <http://summer.berkeley.edu/>.

# City & Guilds

## CITY & GUILDS CENTER (C&G)

Istanbul Aydın University is a center of the globally known City & Guilds which is, as of the academic year of 2009-2010, the proficiency and accreditation body in Turkey. Thanks to this center, IAU students have advantages of becoming more proficient and equipped when they go abroad both via branch programs, Erasmus and similar projects and in the competitive environment which is awaiting them in their business life.

## WHAT IS CITY & GUILDS?

City & Guilds was founded by the directive of Queen Victoria of England in 1878, and from that day on under the auspices of the United Kingdom coupled with its hundred years experience in education, it is the pioneer among institutions which give internationally valid professional and foreign language proficiency (English) certificates. Under standardized quality, City & Guilds is an England-based social organization. C&G authorizes education institutions in various countries of the world to be English Proficiency Test centers. There are more than 8000 test centers which have authority to certify and educate in many fields such as vocational and foreign language training.

## WHAT KIND OF BENEFITS DOES C & G PROVIDE?

- It is an alternative to language proficiency tests such as TOEFL/IELTS.
- It ensures your level of foreign language officially in visa procedures.
- It enables you to work in England and other European countries.
- It solves Erasmus candidate students' foreign language problems.

C&G and foreign language (English) certificates presented by C&G and IAU are legitimated by international quality control units.

## EXAM CENTERS

Istanbul Aydın University is the center of foreign language education (English) and its first and foremost purpose is to give a EUROPASS additional document besides a test certificate at the end of this language education. C&G is the single institution which can give a EUROPASS Foreign Language Certificate of the European Union. In accordance with the European Union Language Framework, this center provides our students and foreign students with a certificate at the end of their foreign language education in Istanbul Aydın University, and was established on 20.04.2010 following the agreement with City & Guilds.

## ISTANBUL AYDIN UNIVERSITY AS C&G CENTER

IAU is entitled to be the center of the exams stated below. Test documents or papers are sent to IAU from C&G England. After the exams have been administered, the test papers are then sent to C&G for evaluation. Thus, a certificate of language level which is objective and accepted in the European Union is presented.

- a- International English for Speakers of Other Languages (IESOL)
- b- International Spoken English for Speakers of Other Languages
- c- Young learners ESOL
- d- Young learners Spoken ESOL
- e- Spoken English Test for Business SETB
- f- English for Business Communications
- g- English for Office Skills
- h- Access Certificate in English (Language Teaching Qualification)

## TOEFL iBT

## TOEFL AUTHORIZED TEST CENTER

Istanbul Aydın University has been the authorized TOEFL test center as of 2010 with the successful launch by the School of Foreign Languages. Academicians or students who want to certify their English level and every aspirant can take the Toefl exam via Istanbul Aydın University.

“a strong university  
which believes in a brighter future...”

We are proud of educating the enlightened people of the future with our academic staff who have succeeded internationally in their fields.

*Prof. Dr. İbrahim Adnan Saracoglu, IAU Academic staff*

# ERASMUS STUDENT EXCHANGE PROGRAM

Istanbul Aydın University welcomes European students within the LLP-Erasmus Exchange Program and further sends Turkish students to our partner universities in Europe. IAU has Erasmus Bilateral Agreements with 77 partner universities across 19 European countries. In 2011-12 academic year, IAU had 35 incoming students and 86 outgoing students.

## PARTNER INSTITUTIONS

### AUSTRIA

**“enterprising university  
which believes in a brighter future...”**

“Istanbul Aydın University is meeting the requirements of being a world famed university by the international activities and organizations carried out and is aware of its social and cultural works and social responsibilities. It is a world university carrying out national and international social and educational collaborations.”

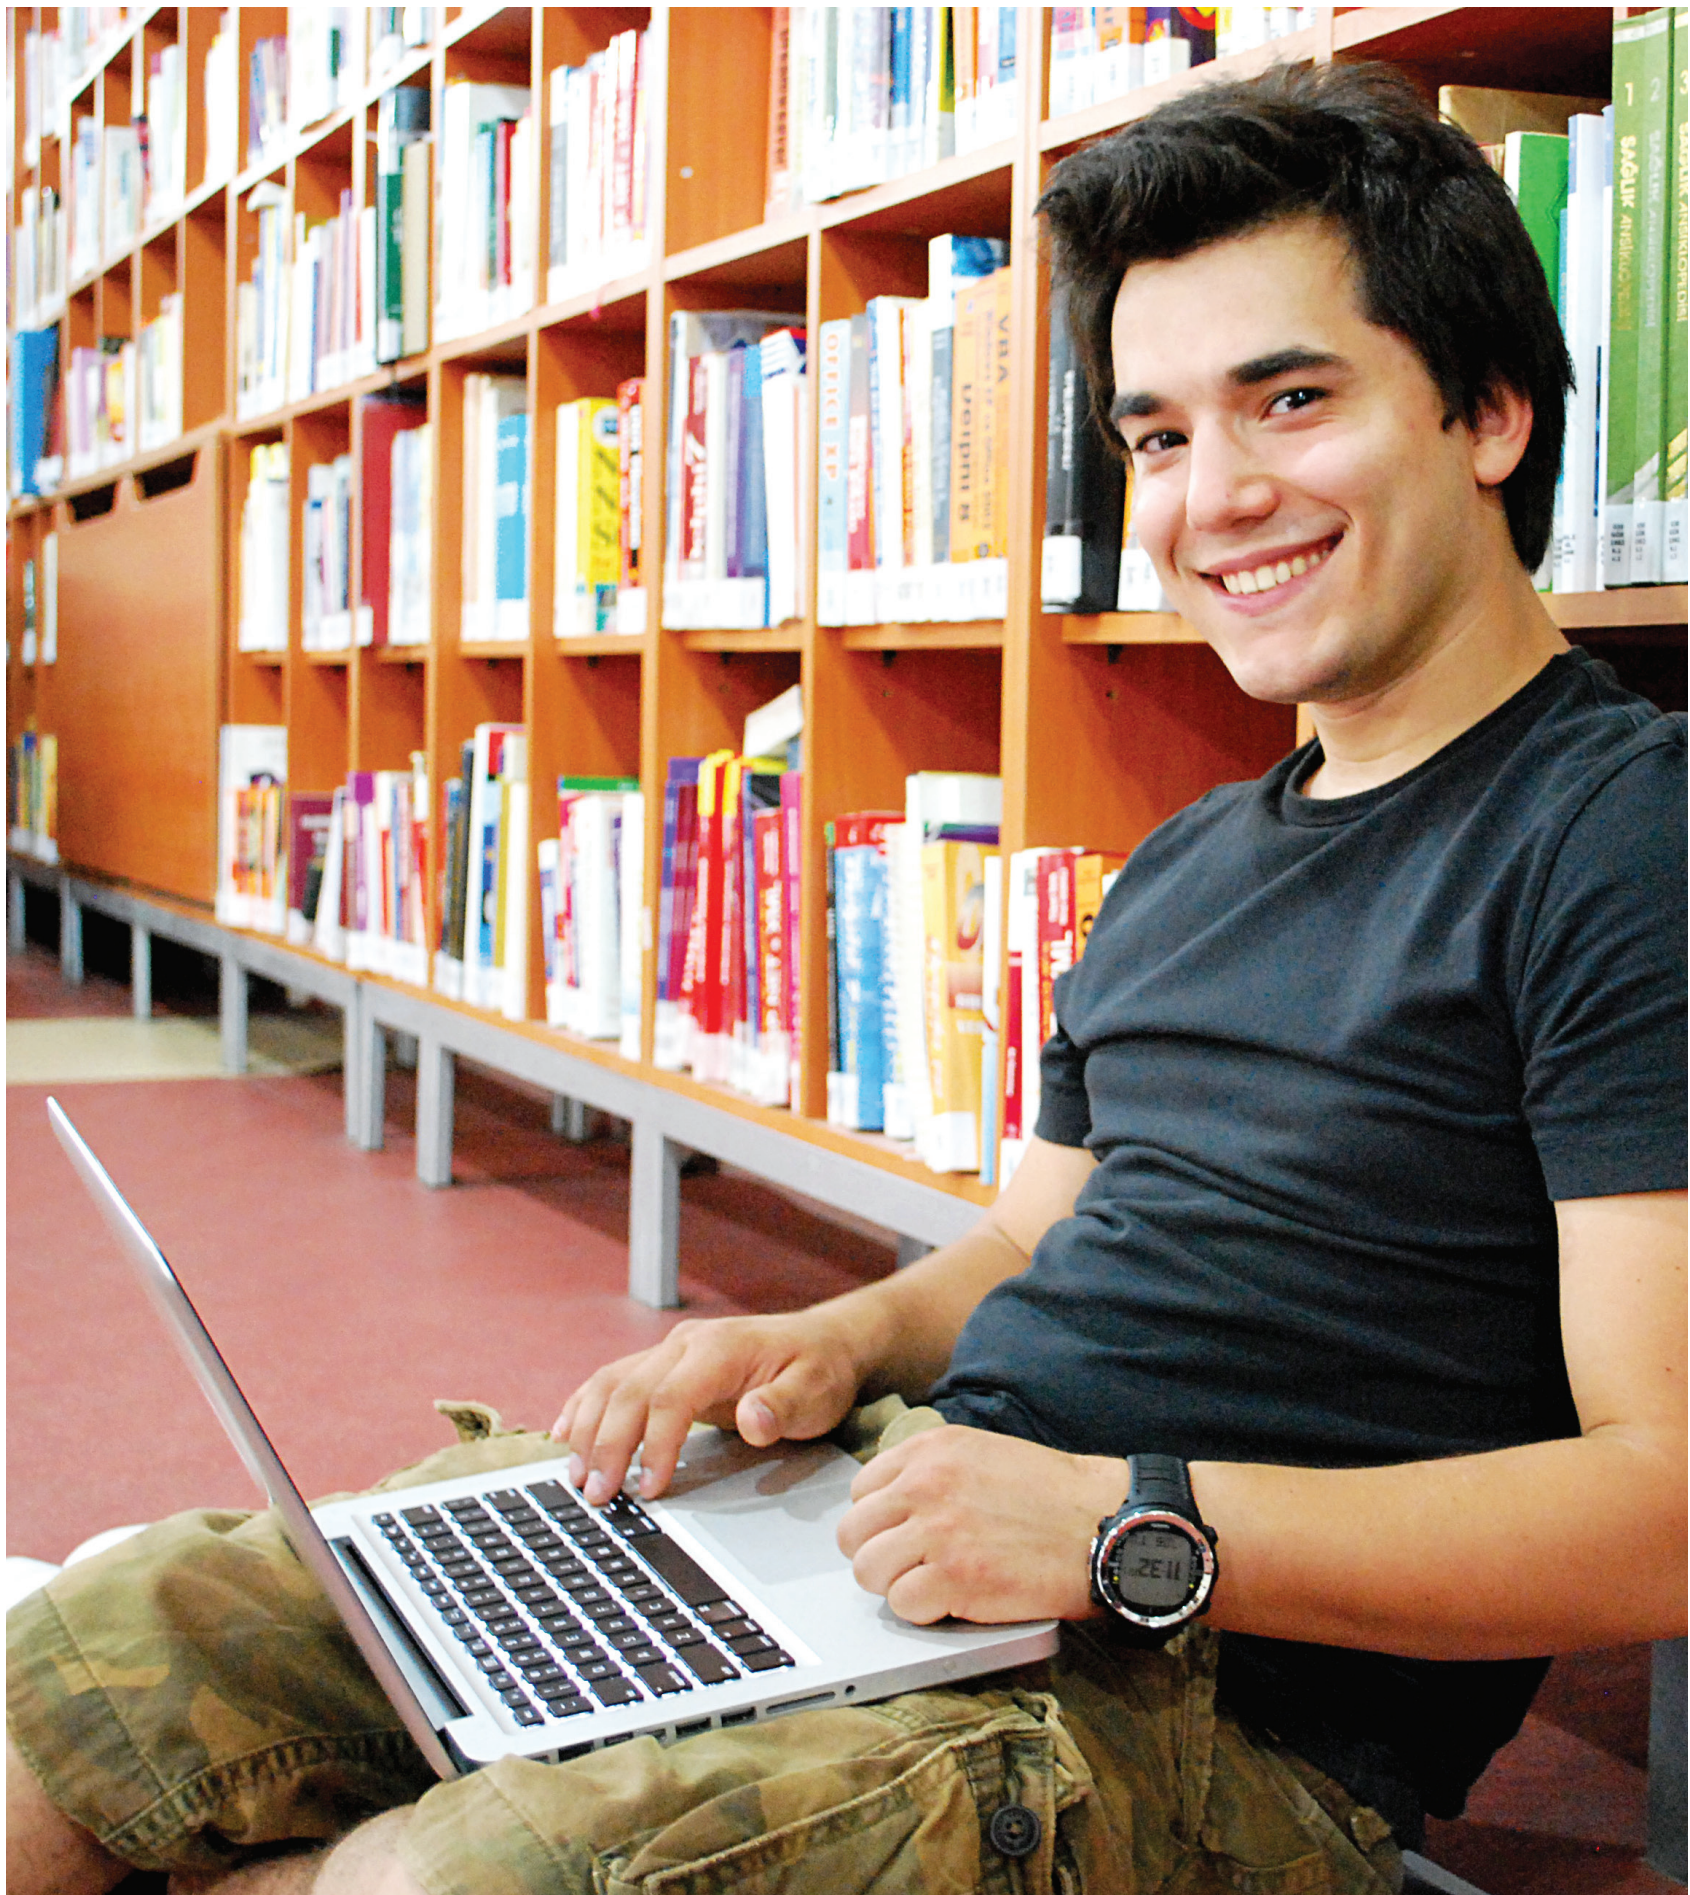

*Berrin Tavman, Director of Hedef Group Human Resources*

## OUR EDUCATIONAL OPPORTUNITIES

### STUDYING DOUBLE MAJOR UNDERGRADUATE PROGRAMS

If they wish, Istanbul Aydın University students in license degree programs other than the program that they are registered on can get a second license degree diploma by taking at least 36 credits of a course at any undergraduate program determined by the İAU Senate.

### MINOR EDUCATION

If they wish, Istanbul Aydın University students in license degree programs other than the program that they are registered on can get a second license degree diploma by taking at least 36 credits of a course at any undergraduate program determined by the İAU Senate.

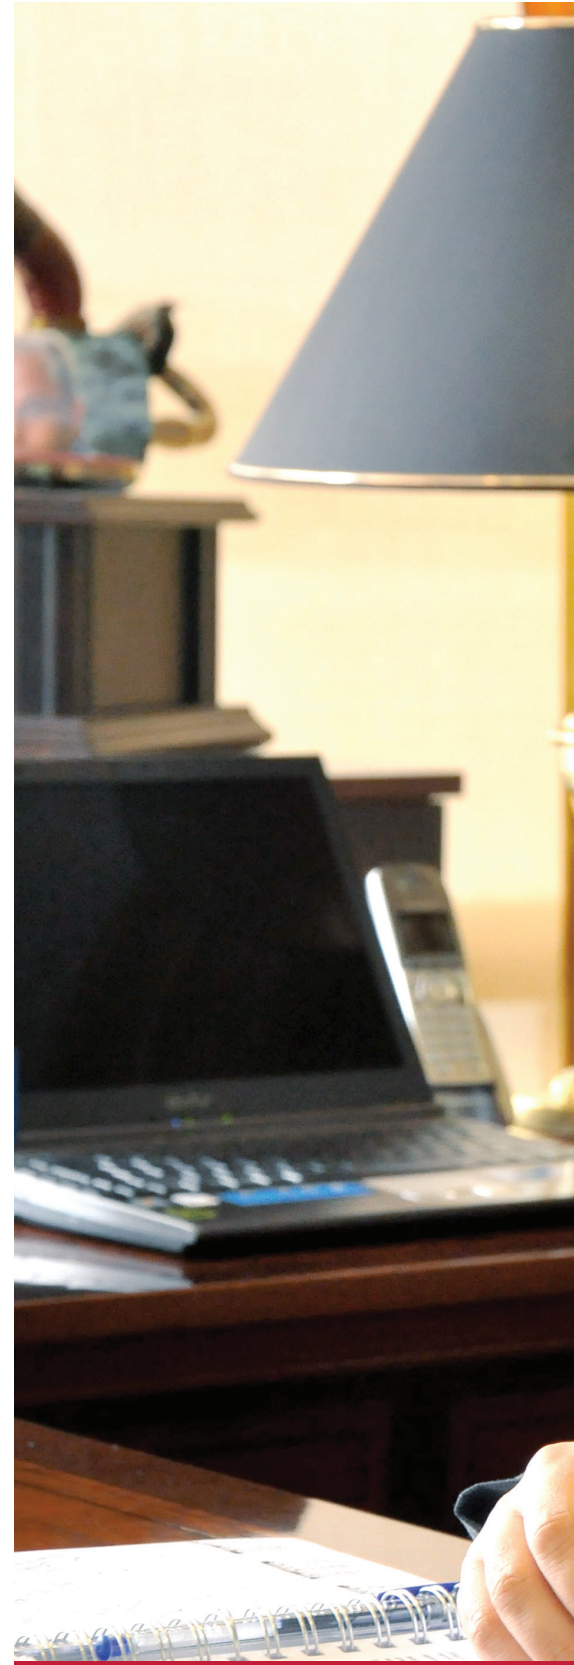

### TRANSITION BETWEEN DEPARTMENTS

Attending a program for at least one semester, our successful students, except in the preparatory program, may switch to programs which require the same level of scores and involve the same lecture content.

**"my choice  
ISTANBUL AYDIN UNIVERSITY**

"Knowledge can only be as valuable as its applicability. A good university must go forward not only in education but also in research and application areas. Istanbul Aydın University's agreements with the business world help our students encounter real working conditions and provide them with the opportunity of practicing the information they acquire. Thus, graduate students find strength and courage to overcome any difficulty they may face."

*Dr. Nedim TRKMEN, Turkmen Consulting and Financial Consulting Group, Chairman of the Board*

# DEVELOPMENT CENTERS

## ON THE JOB TRAINING COORDINATORSHIP

The purpose of the department is directing our students to the institutions and organizations related to their study field so that they can bring their theoretical information into practice and reinforce their practical knowledge. All the institutions and organizations that support and cooperate with our university in the context of social responsibility and support for education are our solution partners.

Our students who will have a certain profession in the future are directed to the appropriate departments of our solution partners on certain days of the week and asked to monitor and familiarize systems. Next, they are encouraged to contribute to the work flow and processes for mutual benefit and efficiency. Thus, our students gain practical experience while their education continues. By experiencing professional business life, they will be able to create a clear picture of their future business in their minds for after graduation.

Institutions and organizations will be able to employ those students who perform and adapt well after they graduate from university.

The aim of the center is to train qualified labor force that are needed by different business sectors and provide consulting and training activities for institutions and organizations.

Supporting the process of 'Development through entire life', seminars and certificate programs are organized. Between 2006-2009; 6251 people were trained for 17326 hours on 101 different training programs. Between 2009-2010, a total of 6604 people were trained for 11607 hours on 140 training programs.

- Certificate Programs
- Personal Development Trainings
- Institutional Trainings
- Specialty Trainings
- Sales Development Training Programs
- Skill Development Training Programs
- Foreign Language Courses
- Vocational Training

Istanbul Aydin University is a center that helps its graduates to do their own career planning according to their interests and skills and guide the work that is appropriate to their experience gained and equipment acquired

The Graduate Placement Center, which forms the link between graduates and the institutions regarding work placements of our university graduates to elite institutions, was established to help develop their skills on 'getting hired' and 'staying hired'.

The purpose of our center is to help our graduates to find valuable business opportunities by using their knowledge and skills. In addition, it helps them plan their careers and to organize events where students can get information on work sectors for potential employment.

Another goal of our university is to introduce our students to business life and companies after their graduation and help them create their career awareness and plan the future. In accordance with this target we help our students develop themselves by analyzing our country's successful companies and giving them information about necessary qualifications that are needed by these companies. On one hand, employment possibilities will be provided to our students, on the other hand a qualified labor force will be presented to our country's economy.

The Graduate Placement Center reaches Istanbul Aydin University graduates through its CV pool and helps them find an appropriate job that matches the qualifications the company needs. Interview stages and the recruitment process for an appropriate candidate is then pursued. Eighty-six percent of our graduates in the last three years following graduation, settled to work within a year.

**MEYEK**

**“a technological university  
which believes in a brighter future...”**

Istanbul Aydın University technological center is the largest laboratory complex located in one single area in Turkey.

*With 11 Laboratories, it is The Largest Laboratory Complex Located in One Single Area in Turkey*

# TECHNOCENTER

“Towards the light of science...”

## ISTANBUL AYDIN UNIVERSITY TECHNOLOGY CENTER

Engineering education is getting more complex every day and requires a rapid transfer of information that involves high-tech knowledge and skills. This education and training should provide development in practice and problem-solving skills as well as in information. And this involves the development of an application-oriented engineering education and training model. Established on the basis of these considerations, Istanbul Aydın University Techno center is a unique and integrated research complex which takes a holistic approach for engineering education and training.

**Istanbul Aydın University Technocenter contains;**

- Real Time-PCR Laboratory of Genetics and 1-2
- Food Engineering Laboratory
- Chemistry Laboratory 1-2
- Mechanics Laboratory
- Mechatronics Laboratory 1-2
- Modular Electronics Laboratory
- \* Automotive Laboratory
- Textile Microscopy Laboratory
- CNC Laboratory
- Communication and Control Systems Laboratory
- Central Laboratory
- \* New Generation LED Lighting, LED R & D and Measurement Laboratory

Istanbul Aydın University Techno center is capable of doing basic and applied science research projects, master's, doctoral and other scientific researches as well as serving as a reference laboratory for analysis and testing that the business world requires.

### GENETIC AND REAL TIME- PCR LABORATORY

The importance of different areas preferred by users of Real-time PCR technology are increasing rapidly. Gene expression is preferred because it is more precise, efficient, fast, and more productive. Polymerase Chain Reaction (PCR) which is used to replicate a predetermined region of the DNA chain, is a revolutionary method in the field of molecular genetics. Experimental research applications and the growing real-time PCR systems are preferred because the determination provided superior advantages and point mutations in the diagnosis of infectious diseases.

Our country is spreading all over the world in real-time PCR systems which are a solution for many molecular genetic laboratories emphasis on speed and quality. In the laboratory, Agilent® Real-Time PCR System and supporting equipment, microbiological and sterile working booths, preparation of experimental equipment and materials, cooling and storage systems, and sample preparation tools are available.

The laboratory was established to provide a high level of sterile environment and input-output control of cabinets is provided with the door systems. Similar laboratories are located under the Ministry of Agriculture, foreign and national companies and organizations with large R & D departments. GMOs (Genetically Modified Organism) and the finding of a determination can be made easily; in the laboratory new, modern equipment, and instruments are available. Investments in food safety are of growing importance in the world and in our country.

Istanbul Aydin University has made its most serious investment with the German Alexander von Humboldt Foundation with an investment focused on social responsibility policies on food safety. This laboratory, apart from serving the relevant area, also allows master's, doctoral and advanced research studies funded by TUBITAK and the European Union.

### FOOD ENGINEERING LABORATORY

Students after graduation are prepared as equipped engineers by the Food Engineering Laboratory which has been established to move our university curriculum from a theoretical level to the applied level.

The Food Engineering Laboratory is an instrument that has been developed with the latest technology, devices and equipment rendered in a modern device within a research park. Food Engineering students in this laboratory find the opportunity to test practical lessons during vocational training.

In the Food Engineering Laboratory students will work in experiment groups of three. The laboratory is designed and equipped with modern laboratory safety regulations and in accordance with the test infrastructure. It consists of a laboratory equipment park, incubators, water baths, precision weighing systems, test benches and cabinets, which allow the analytical and microbiological testing devices, conductivity, pH meters, agitators and mixers, colony counters, microscopes, centrifuge systems, refractometers, evaporators, autoclaves, ovens, Liquid chromatography, Gas Chromatograph, Viscometer, distillation unit and a large number of quantitative and qualitative tools and equipment, providing the opportunity to test.

Istanbul Aydin University Food Engineering Laboratory serves both public and private sector investment in the areas of food safety agencies and chemical and microbiological analysis of food at this level. The laboratory has the capacity to respond to future demands of the testing service with the help of the park and public and private-sector health institutions involved in food.

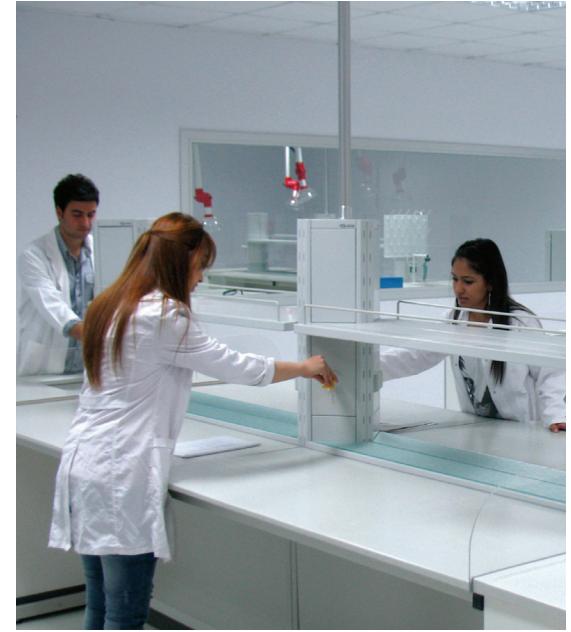

### CHEMISTRY LABORATORY

In the laboratory, the common elements and characteristics of the analysis and identification of compounds and experimental study of general chemistry make it possible for students to gain skills.

In the General Chemistry Laboratory, 30 students can do experimental work at the same time in this properly designed and equipped space with modern laboratory safety rules. The laboratory has been established for analysis of wet and dry enough for the students of the engineering department of laboratory benches, work cabinets, oven and ash furnaces, water baths, precision weighing systems, bathrooms, agitators, mixers, all kinds of consumables, liquid chromatography, gas chromatography, spectrophotometry, including the park with a modern device.

With this device, park, general, analytical, quantitative and qualitative tests, and instrumental analysis can be conducted easily. This laboratory is equipped to provide support studies and tests in collaboration with other laboratories. . Istanbul Aydın University General Chemistry Laboratory serves the public and private sector investment in the general field of chemistry for chemical analysis at this level.

### MECHANICAL LABORATORY

Both the students and faculty members will design a variety of parts in assemblies themselves that they need in experiments and these parts will be produced in this mechanical workshop. Our workshop is fully equipped in machining and chipless sheet metal fabrication and manufacturing applications.

Our technicians have the education that will help to carry out the demands of manufacturing and the future of our students and for academic studies and tests. The mechanical workshop integrated mechanical laboratory is equipped with tensile strength and stiffness analysis, precision cutting, hot and cold mounting, grinding, polishing, and surface analysis instruments.

Here, the determination of mechanical properties and microstructure analysis of materials will be done. We aim to give service to industrial firms as well as academic studies with latest system of laboratory equipment. We are ready to cooperate and share all the opportunities we have with our country's industrial enterprises. Next year, in addition to the existing laboratories, the CNC production machines in our lab will be equipped with Computer Aided Design and Manufacturing (CAM - Computer Aided Manufacturing).

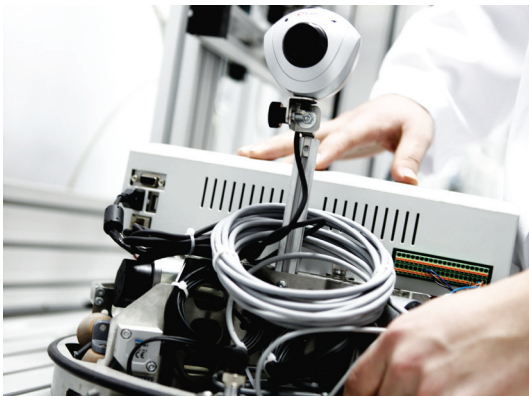

### MECHATRONICS LABORATORY

Detect, measure: this decision moved in the direction of the automatic machine (ie mechatronic systems) in medicine, agriculture, banking, mining, the machinery industry and mechatronics applications in many areas of modern automation technologies, which allow for defining samples. Istanbul Aydın University, Mechatronics Laboratory gives a chance for university students to try out in practice the theoretical knowledge acquired during their education. In laboratories, there are fields of studying pneumatic, electropneumatic, hydraulic sensors and actuators as well as training and test sets, sets to work, robotic assembly stations, mobile robots, and process control. All of these training and test sets consisting of industrial products mean the university curriculum will not carry the theoretical level, but will arm our students after graduation as prepared engineers.

The laboratories offer a wide range of educational activities of work space which will be used for both academic staff's research and development studies. In addition, we are ready to share the possibilities with industry associations of our country and are ready to cooperate in consultancy on training, production and analysis. Next year, in addition to the existing laboratories Flexible Manufacturing Systems Laboratory (FMS-Flexible Manufacturing Systems) and Computer Aided Manufacturing Laboratory (CAM-Computer Aided Manufacturing) will also be implemented.

### **MODULAR ELECTRONICS LABORATORY ELECTRONIC LABORATORIES**

Anadolu Bil Vocational College of Computer Technology and Programming and Automotive Programs, Istanbul Aydın University Faculty of Engineering and Architecture, Electrical and Electronic Engineering, Computer Engineering, Mechanical Engineering and Mechatronics Engineering department is scheduled to open in the future, meeting the needs of nature. In addition, laboratories that test kits could be made using the Physics II course. Experiments which combine theory and practice of visual and acoustic systems enable the student step by step to explain how the experiments are done. In addition, the test kits that are easy to be added to the renewal and experiments to design new experiments based on the student's self-development opportunities also provide the ability to think and develop. Here are the main subjects of experiments which are done in the laboratory:

1. Basic electricity and electronic experiments
2. Electronic circuit elements
3. Digital electronics
4. Control technology
5. Power technology
6. Transmitting and Receiving Technology
7. Automation/Bus technology
8. Modem technology
9. Automotive technology
10. Electropneumatic

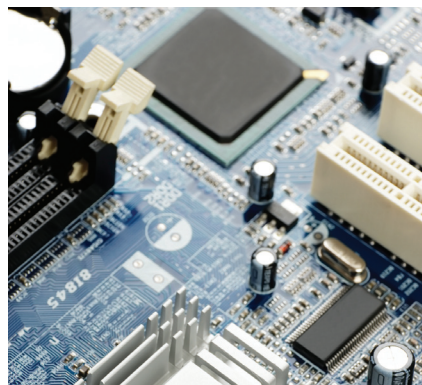

### **TEXTILE MICROSCOPY LABORATORY**

Human life and the demands of today's higher standards has upgraded the quality of all industrial products and features are being developed. In clothing, household and industrial textiles in the quality and features, new functions are developed gradually. In textile products for more and higher features only mechanical, physical, and chemical investigations and research are relevant, but these, as well as microscopic examination and research, are of great importance.

Textile microscopy has been a service of the textile industry for decades. Plant, animal, mineral, chemical, synthetic and all kinds of textile fibers, textile raw materials, ie species and the subtleties of the surface forms, in determining the folding patterns (identification of fiber), cross-

sectional forms, rates, detecting components of the mixture of the mixed products, chemical and physical processes that occur at the end of the changes in fibers, fiber damage both physical and chemical, fibers color difference, and so the presence of foreign particles – there are many states to identify, review and research so textile microscopy is very important. The advancement of technology is always smaller than the building blocks of our era, and our bodies have played a major role in visual curiosity. Very small nano-sized building blocks mean of course that great advances are magnified to make them visible and understandable. Today nano-technologies are used with very different properties of various processes in the development of brand new modern textile products, and textile raw materials and research on microscopic examination has been made possible by and large.

Istanbul Aydın University Textile Microscopy Laboratory, in addition to providing educational services to students in engineering with textile fiber microscopy also related to our industry at all levels, will provide research and development services.

### CENTRAL LABORATORY

The Central Laboratory was established as a general-purpose unit, to respond to the demands of university research and experimental testing as well as the future demands of the public and the private sector. Laboratory owned equipment, park equipment and device physics, chemistry and biology with the basic disciplines of applied sciences such as chemistry, food, and physics in particular is able to meet the needs of engineering departments.

The Central Laboratory, specifically so as not to be considered under a section other than the basic and applied sciences and the university, was founded to meet the demands of the next tests. Another advantage of this laboratory is that a joint analysis and testing would need specific laboratories that can easily be done. The Central Laboratory set-up has importance for our country and abroad, especially as the purchase of service is preferred for general research projects. In addition, graduate, doctoral and academic scientific experimental research makes it possible.

The University has established academic laboratories, in both the public and private sector, particularly its curriculum and experiential requirements to strengthen the infrastructure of an investment carried out within the framework of the Global Perspective Plan.

The Central Laboratory has chemical, physical, and biological analysis, with measurements that have an infrastructure in order to gain comprehensive qualitative and quantitative results. The park of laboratory equipment is an area of basic physics, chemistry, biology and applied science laboratories in support of a common area that collects and provides the flexibility to serve the university which is organized as a unique administrative structure.

### COMMUNICATION AND CONTROL SYSTEMS LABORATORY

Communication and Control Systems Laboratory, offers a working environment to apply the theoretical knowledge learned in lectures such as fiber optic communications, GSM and GPS experiment sets with FSK, ASK, PSK as modulation / demodulation of the experiment sets the basic communication and advanced communication systems through various experiments for the students .

### AUTOMOTIVE LABORATORY

We are able to follow today's technology with equipment in the automotive technology laboratory. The most important of these is currently used in the study of production of alternative fuels to petrol and diesel oil. Alternative fuels, biodiesel and hydrogen-powered engines are studied. In addition to these, tools can be tested for fault detection with our equipment. Conventional gasoline engines, and electronic ignition are shown in a practical and visual way. Given this, starting systems, charging systems, air-conditioning systems, cooling systems, air brake systems and electronic alarm systems are shown visually both theoretically and practically.

Diesel motor vehicles to increase the performance of a common-rail fuel system is of the work set up in this workshop. Given this, diesel fuel pumps and injectors operating systems to realize the DPA and the electronic regulator, fuel pumps, engine disassembly, adjustment and control are available if trying to install the engine. Diesel fuel system trouble shooting methods are studied.

### CNC LABORATORY

CNC Lab is equipped with the latest technology. Our goal is to give students opportunities to practice their theoretical knowledge as well as the best way to prepare for professional life. At the same time this high-tech facilities provided by presenting students with laboratory training, technical sense, to develop themselves, taking advantage of the maximum level of production technology to use to make the most efficient manner and time provided. CNC numerically controlled lathes and milling machines in our laboratory with the students in the computer environment designed for professional life before being discarded in this way can produce parts, find the opportunity to apply what they have learned.

### AUTOMOTIVE LABORATORY

We are able to follow today's technology with equipment in the automotive technology laboratory. The most important of these is currently used in the study of production of alternative fuels to petrol and diesel oil. Alternative fuels, biodiesel and hydrogen-powered engines are studied. In addition to these, tools can be tested for fault detection with our equipment. Conventional gasoline engines, and electronic ignition are shown in

a practical and visual way. Given this, starting systems, charging systems, air-conditioning systems, cooling systems, air brake systems and electronic alarm systems are shown visually both theoretically and practically.

Diesel motor vehicles to increase the performance of a common-rail fuel system is of the work set up in this workshop. Given this, diesel fuel pumps and injectors operating systems to realize the DPA and the electronic regulator, fuel pumps, engine disassembly, adjustment and control are available if trying to install the engine. Diesel fuel system trouble shooting methods are studied.

### NEW GENERATION LED LIGHTING R & D AND MEASUREMENT LABORATORY

Is the first LED lighting laboratory that is supported by Istanbul Development Agency financial support program for organizationssupported by the environment and energy friendly cooperation with the University-Industry-oriented laboratory. By this laboratory R&D work that is going abroad in the field of LED lighting gives capability of producing companies to increase their competitiveness by making it permanent. In addition, LED lighting, depending on the studies related to the optical, material science, electronic circuit development, wireless communication technologies, sensor technologies, power electronics, thermal analysis, fluid mechanics would be an increase in the number of issues such as master's and doctoral theses. The first example of successful application in this field is the laboratory, both universities, as well as in various regions of Istanbul, especially companies working on LED lighting, is expected to establish a similar R & D labs.

a living university  
which believes in a brighter future..."

"As a city university, Istanbul Aydın University provides its students a place with different and colorful social, cultural and sports activities as well as academic opportunities."

# CULTURAL LIFE AND CLUBS

## OUR CULTURAL LIFE

Istanbul Aydın University seems like a living organism. From politics, business and bureaucracy, leading figures attended the weekly "Hayata Dair" conferences, thousands of students gathered at different times in order to recognize the historical and cultural places with trips, poetry, literature, cinema, theater and dance performances, and technological innovations in the field to share information, and in this area IT days were held to encourage young talent.

## STUDENTS CLUBS

Student clubs and societies, as from the dates established, and non-governmental organizations will be useful in understanding the various activities conducted in the near and distant surroundings.

### With the help of a club;

- Students have developed strategies for coping with various issues and life difficulties.
- Our students express their emotional energies.
- Students have an opportunity to devote time to themselves with picnics and trips even with the density of academic courses.
- Preventive information and guidance studies are presented.
- For the individual, not only academically, but also artistic, cultural, social events, along with ensuring the participation of individual, social, and emotional satisfaction sources are created.
- Artistic, personal development, the provision of support and participation in social activities so that our students should become happy and enjoy life have been made available to the individuals.

## SOCIAL LIFE

### SOCIAL CLIMATE

Istanbul Aydın University fosters social climates in different areas by taking into account students, lecturers and employees' needs.

In Florya campus, there are six and in Bahçelievler campus three cafeterias which meet the eating needs of 5000 people at the same time. In addition, five garden cafes are located in Florya campus and one garden cafe is located in Bahçelievler campus.

Beverage and food needs of our students are met at reasonable prices in the dining hall, cafeteria and recreation areas, with separate physical spaces created for faculty and staff. In our university a shopping center, bank, beauty and hairdressing salons provide service for all kinds of needs of university students.

There are LSD screens at multiple points of campus in order to follow current events closely.

Wide open green areas of the university provide a resting place for the students. Students are provided opportunities to do sports such as basketball, volleyball, handball, and football with indoor and outdoor sports halls. Besides an indoor sports hall on campus there are two fitness centers for teaching staff and students .

There are conference, meeting, and interview halls designed with technical equipment to respond to the needs of cultural events such as theatre, cinema and seminars etc.

### HEALTH UNIT

Health care units of our university give service for 18 hours a day with three doctors, four nurses and a fully equipped clinic at Bahçelievler and Florya campuses. In addition all students and faculty staff have discount rates in many health centers and hospitals such as Acibadem Hospital, Medical Center of Bogazici, Acibadem Clinic, Memorial Hospital, Acibadem Center for Eye Health, Life, Hospital and Hospital and Dogan.

### PSYCHOLOGICAL COUNSELLING AND GUIDANCE RESEARCH CENTER (PDR - CRS Vice)

PDR-CRS Vice's main aim is to make Istanbul Aydın University students and staff responsible, able to express themselves correctly, armed with positive communication skills as individuals, to support development in a healthy manner and with the help of a variety of psychological tests to help students identify themselves. PDR-CRS Vice is a unit which supports students and staff with individual, social, academic and professional development. This unit prepares an environment for student and staff for their multi-faced development. PDR-CRS Vice, conducted in cooperation with the student council and students make joint efforts to identify problems by questionnaire, interview and meetings. As a result of analysis of the ongoing applications, internal and external referrals are made.

### DORMITORIES

Around the university, state dormitories and private residences are available for schoolgirls and schoolboys. Transportation between university and these dormitories is very convenient because of the location. In the dormitories a layout to meet the needs of our students is created. For detailed information about the dormitories look at our website [www.aydin.edu.tr](http://www.aydin.edu.tr) the section "Dormitory and accommodation" will be sufficient.

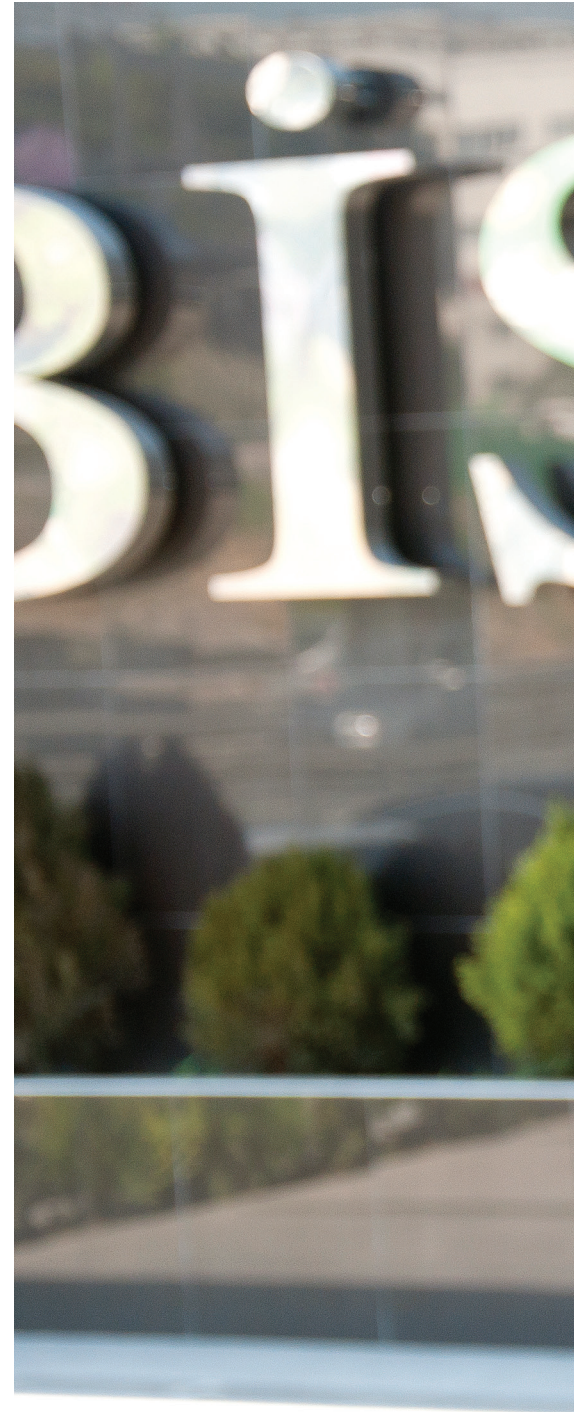

**"my choice  
ISTANBUL AYDIN UNIVERSITY**

"Everybody can have a diploma; but not everybody can be employed. One should "know" in life to be successful; and it is important to use knowledge in a creative way. A good university should make the students practice business-life and should give the opportunity for using knowledge practically. The students of Istanbul Aydın University are educated, can response to the expectations and needs of business life and can practice creative thought."

*Mustafa Kefeli, Kefeli Clothing Industry, Chairman of the Board*

# SOCIAL AND SPORT ACTIVITIES

The athletes of Istanbul Aydın University brought medals to their school in various divisions such as football, tennis, snowboard and karate.

Our teams and athletes won 6 championships, 4 runner-up positions, and 2 second runner-up positions with a total of 12 cups. They also won 65 gold medals, 68 silver medals and 38 bronze medals.

Istanbul aydin University is striving to provide an enhanced social life to its students as well as a high quality education. In addition to their educational success, our students also achieve their goals in arts, sports and technology. Like the past years, after a long and tough season, they brought to their school many cups and medals. IAU supports its athletes by providing them with the necessary facilities and the opportunities to work with professional coaches.

## Victory in the Ring

Buğra Bozaslan, a national boxing team boxer studying at Istanbul Aydın University, took part in the Interuniversity Boxing Tournament organized by Ordu University. Bozaslan challenged Murat Korkmaz from Erzurum University for the final match. Bozaslan won the gold medal and honored Istanbul Aydın University once again.

## New Members for the National Team

One of our athletes, Feyza Can came in second at 53 kilos at the Turkish Karate Clubs Championship and the National Team Audition and was elected to be in the National Team.

IAU Arm Wrestling Team won the championship in the Interuniversity Arm Wrestling Championship organized by Interuniversity Sport Federation. Our team won the championship with 2 gold medals, 4 silver medals and 4 bronze medals.

Istanbul Aydın University Women's Basketball Team became the champion in the Interuniversity First League Basketball Tournament organized at the sport complex of Istanbul Technical University. Our team won 12 gold medals in the tournament.

Our team came in second at The Super League Qualification Tournament hosted by the Hitit University and qualified for The Super League.

## We reward our athletes with scholarships.

Istanbul Aydın University grants the Success at Sport Scholarship to the successful athletes who were admitted to any faculty or programme without any other scholarship. To be eligible for this scholarship, the athletes have to play in national or international matches. The amount of financial support is determined by the Board of Trustees.

## We are Successful in Every Field

Our teams have won a number of cups in popular sports including football, basketball, tennis and volleyball as well as other sports like wrestling, karate, arm wrestling. They can benefit from all the facilities of Istanbul Aydın University during their education.

## Our Volleyball Teams on the Super League

Men's volleyball team and women's volleyball team of Istanbul Aydın University both won the championship at the Super League Qualification Tournament and qualified for the Super League. Our teams won 34 gold medals in total.

# RESEARCH CENTER

## **DISASTER TRAINING PRACTICE AND RESEARCH CENTER (AFAM)**

AFAM's work scope comprises working in collaboration with the related academic units of the University to coordinate and promote interdisciplinary research activities in the field of domestic and international disaster management and to create knowledge which is to be disseminated beside the most ideal applications using a variety of communication resources.

## **ORAL AND DENTAL HEALTH PRACTICE AND RESEARCH CENTER (ADSM)**

Istanbul Aydin University Faculty of Dentistry and Dental Practice and Research Centre plans to educate young people who have enough quality and quantity to compete with dentists in the world. The objective is to train dentists who are fully equipped in theoretical and applied areas with knowledge of foreign languages at the highest level and can work everywhere in the world. The Faculty of Dentistry also provides quality services to the public in its diagnostic and treatment center at Istanbul Bahcelievler.

## **ATATURK'S PRINCIPLES AND REVOLUTIONS HISTORY RESEARCH AND APPLICATION CENTER**

The aim of the Center is to train the Turkish Youth as individuals who have gained full insight into their national, moral and cultural values as well as into the duties and responsibilities they owe toward their state. We want them to have an unshaken conviction that the Turkish Nation, with its country and people, is an indivisible integrity. They are trained to have full awareness of and sincere commitment to Ataturk's Principles and Revolutions, and driven by this conviction to endeavour to serve their Nation and State in the best way possible. The centre also carries out studies on Ataturk principles, their meaning, objectives and on the services of the Turkish Nation to human kind.

## **ENERGY POLITICS AND MARKETS PRACTICE AND RESEARCH CENTER (EPPAM)**

EPPAM; The aim is to conduct and follow the works in the field of energy policies and markets in order to contribute to the creation and improvement of Turkey's energy policies within international developments and experiences; and to carry out researches for the formation and maintenance of energy policies which develop and evaluate the national sources in accordance with the national interests, depending on the changing conditions.

## **NATIONAL SECURITY AND STRATEGY RESEARCH AND APPLICATION CENTER (USAM)**

Established in affiliation with Istanbul Aydin university, National Security and Strategy Research and Application Center aims to conduct and support research to create and implement realistic security policies that are beneficial to the country and train specialist.

## **TURKISH LANGUAGE TRAINING APPLICATION AND RESEARCH CENTER (TOMER)**

Tomer is established to teach Turkish to foreign students in a modern learning environment with modern methods. The education program of the center is formulated according to the Common European Framework of Reference for Languages. Lecturers working in the center are experienced in this and have a learner centered approach.

## **TURKEY STUDIES APPLICATION AND RESEARCH CENTER RESEARCH (TAM)**

TAM is established to carry out research and application with an interdisciplinary approach and to make scientific interpretation on Turkey's political, legal, economic, social and cultural issues. Within the framework of this objective, TAM runs social, cultural, political, economic and qualified research and activities.

## **DISTANCE EDUCATION APPLICATION AND RESEARCH CENTER**

Since the 1950s, Distance education system in our country has become increasingly common especially in the field of adult education and higher education. Taking into account the need, Istanbul Aydin University has set up a distance education center which has an associate degree and graduate programs. The center is currently conducting a graduate education program on E-business and an associate degree program in Tourism and Hotel Management and on Computer Programming.

**"the university which believes in a bright future..."**

## the university that rewards success

“modern university  
which believes a bright future”

“Istanbul Aydın University provides higher education opportunities such as modern classrooms, lecture halls, laboratories, libraries, conference halls, and every kind of place that is equipped with a technical infrastructure for its students.”

*We are Developing by Changing, Changing by Developing*

## THE PHYSICAL AND TECHNICAL OPPORTUNITIES

### THE PHYSICAL OPPORTUNITIES

Istanbul Aydın University campus, establishing the concept of a city university, offers its students a university life which is full of different colorful activities academically as well as socially and culturally .

Istanbul Aydın university began in Bahçelievler in 2004 and 2005 and since 2005-2006 has continued its education activities at Florya, Bahçelievler and Beşiktaş campuses in addition to Bahçelievler dental and has 120.000 m physical space providing its students with university opportunities of modern classrooms, laboratories, libraries, conference rooms, equipped with modern technical infrastructure sites for all kinds of education needed.

It gives an opportunity to go to campuses which interact with the social environment in urban centers nested in the business world by private or public transport in an easy ,fast and economical manner.

It offers students all the needs of a qualified university education with classrooms in academic areas, lecture halls, libraries, computer laboratories, foreign language laboratories, and private and business laboratories and drawing workshops, modern infrastructure in studios of radio -television, press and broadcasting technologies, and photography and cameras plus Istanbul Aydın university techno park.

Istanbul Aydın University has assumed a leading role among institutions of higher education by offering students different opportunities by developing their social identities with conference rooms. Cafes, sport centers, closed sport centers, car parks and restaurants.

### TECHNICAL OPPORTUNITIES

Istanbul Aydın University follows developing technology closely and offers its students seamless information support with the opportunities offered and technology required by a modern education and IT infrastructure.

The IT center constructed with high education and technology provides non-stop service between the hours 08:00 -23:00 with technical personnel from the Information Technology Department.

Our university is constructed in a way that in addition to academic and administrative staff, students can also access the campus broadband internet service from any point within reach by wired or wireless means.

It provides all the academic ,administrative staff and students an e-mail service and the opportunities of communication with the staff in the call center ,with academic automation system all the transactions they need are provided online with internet and mobile devices, or from the kiosks in many points in school.

Our university is making joint efforts with many leading technology firms and the latest technological developments are presented to the students with seminars and various activities. Continuing education center organizes seminars and training about the things you need in the field of technology in the future with the trainers who are specialized in the subject.

Also our university has the technical system that the students need for distance education. Computer users are going through all the encryption and description of profile transactions from any computer to any other person's computer, it save their password and the session opened provides access to information.

All infrastructure needed in every kind of education is constructed with 24 computer labs and with Microsoft , Linux, Macintosh operating systems and computers that have the latest technology. Particularly in information technology-related courses, the university is indispensable for many programs and interactive training can make a complete learning method. In all the classrooms and the laboratories projectors and other visual aids are used. Istanbul Aydın University courses are among leading higher education institutions in implementing the project of smart boards according to the academic content.

Our University provides students with the tools of developing software and design the students needs for free. The University serves with 2 laboratories and the TOEFL iBT center. With many events and activities in our university's digital signage service and with many LCD screens students are informed in the social field. To ensure your safety, inputs and outputs are checked with a multi-point access control system and are monitored by security cameras.

# FACULTY OF DENTISTRY

---

DENTISTRY ♦

---

*Dear Students;*

*The Faculty of Dentistry, Oral and Dental Health Education Research Center, Istanbul Aydın University, established within is equipped with modern technology and a contemporary approach by giving priority to the rights of clinic patients and patients' satisfaction is committed to provide the best service to the society.*

*The center is located within the Oral Diagnosis, Oral and Maxillofacial Surgery, Dentistry and Endodontics, Endodontics, Prosthodontics, Orthodontics, Pedodontics, Periodontology and Oral Implantology, and the Departments of Radiology and is served by expert doctors and experienced staff.*

*The center allows patients to be treated with general anesthesia in adult and pediatric operating rooms fully equipped and ready for immediate use for patients with post-operative care given to patients in the observation rooms available.*

*Children Dental patients overcome their fears, or while their parents are treated they enjoy the children's play room which is also indispensable for our children at our center.*

*On the top floor is a cafeteria with a capacity to serve approximately 200 people, and which has an ambiance for our patients and their families to spend time pleasantly.*

*Patients expect international standards, and the latest technological equipment with the best and highest quality service. Patient satisfaction is always our primary goal and will be a source of our pride.*

*Best regards.*

**Prof. Dr. Gürhan Çağlayan**  
Dean of Dentistry Faculty

To train young scientists in the world of science and to ensure proper work suitable to the international standards are the key object of the Faculty of Dentistry. Therefore, in a contemporary approach, students and employees, to contribute to changing and evolving treatment methods for technology will provide all the necessary education and skills of the most advanced physical and technological possibilities will be presented.

The dentistry section consists of five-year vocational training. Preparatory school will be mandatory for the students who are not proficient in English language. Vocational education in basic medical and dental students will be in the first two courses, as

well as pre-clinical professional courses which will improve their technical skills. In order to make the students experienced before graduating students do a three-year clinical study. Students who enter the clinic after 3rd grade will have the opportunity of clinical experience which is very important in dentistry. 5th. classes are mainly given in clinical practice as well as courses in medicine, dentistry and vocational courses will be taken. An integrated internship application will be done for the 5th grade students.

Students will graduate in a real dentist position by completing the patient's treatment in a multidisciplinary clinic which is equipped with ultra modern technology.

**"my preference is  
ANADOLU BIL VOCATIONAL SCHOOL"**

"If there is an idea, you need a process to implement the idea. If you do not know how to do it, and if you do not research and develop, you can not practice. Anadolu BIL School of Theoretical training is overlapping the practice of the business world into the education of business life. University graduates are competent to do the design and can operate more efficiently. Combining theory and practice, deepened and accelerated learning on the one hand, on the other side gives graduates the ability to execute a proper job."

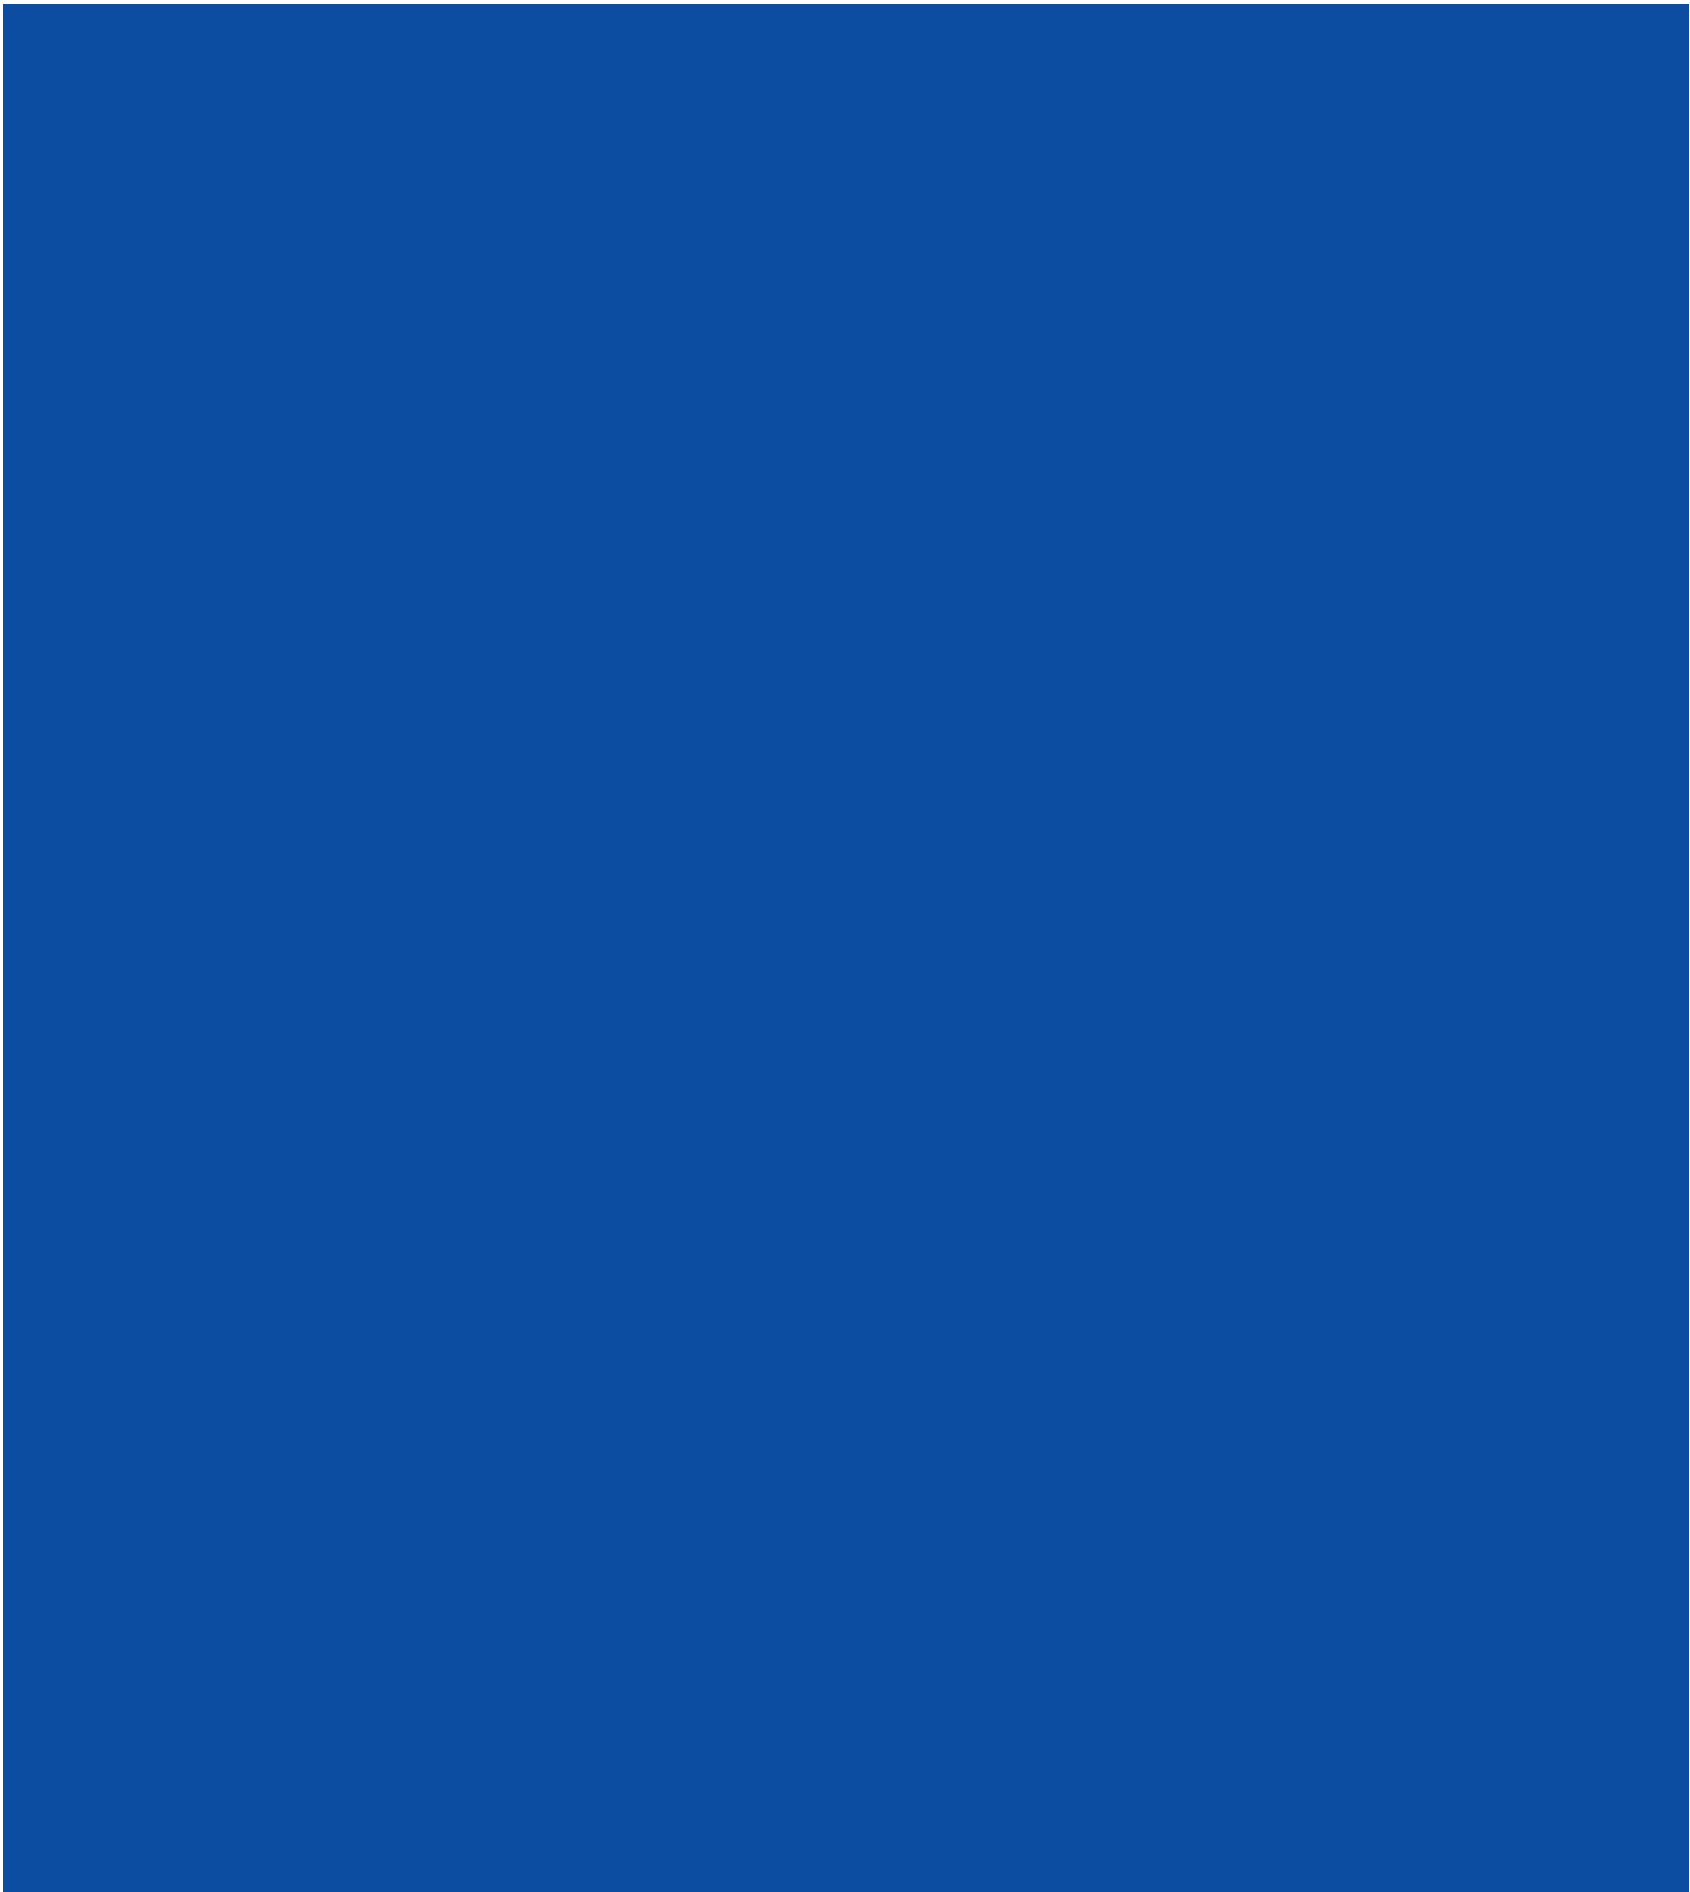

*Başaran ULUSOY, TÜRSAB, Chairman of the Union of Travel Agencies of Turkey*

### MATHEMATICS - COMPUTER SCIENCES

Our graduates can find career opportunities as a teacher at primary and secondary schools, as an instructor at private educational institutions, as maths and computer-aided generating solution specialists in the banking and insurance sectors or at the departments of companies which makes analysis and design of engineering. Besides this, they have opportunities of taking place in research projects and academic careers like postgraduate and doctorate studies.

*Dear students;*

*Our faculty was founded to carry out scientific training, modern education and research activities to meet local, national and international needs, taking into consideration its current infrastructure, the experiences and the specific fields of its teaching staff.*

*Our faculty is aware that our faculty will progress by mutual interaction at an international level with the incorporation of science and views and experiences. We ensure that our students, equipped with advanced knowledge and technology in these departments, will be provided with the educational opportunities and facilities to meet the demands of contemporary society. I wish our students, leading to the same road with us, great success.*

*Best Regards*

**Prof. Dr. Şuayip KARAKAŞ**  
Dean

### ENGLISH LANGUAGE AND LITERATURE

We are sure that graduates of the Department of English Language and Literature will have an exceptionally good record in achieving employment in a wide range of areas such as in universities and schools as scholars and teachers or in international business and relations. They are also entitled to move on to professions which are not directly related to the subject such as journalism and mass media. Thanks to their independent critical thinking abilities and their sound knowledge of western culture, our graduates also have opportunities to find jobs in the fields of publishing, tourism and government services.

### TURKISH LANGUAGE AND LITERATURE

Graduates of the department can become Turkish teachers in secondary schools, universities and language schools. Graduates can also become program producers for TV and radio channels. They can become editors for all publications and they can do their MA and PhD for better job opportunities.

Graduates of the department may be employed in various banks, as an undersecretary in ministries, head offices, insurance companies, military, software companies, public relations companies, universities, logistics companies, in sectors such as automobile and other industrial sectors as vice specialists responsible for the statistical processes.

The target of the department is to graduate psychologists who can provide proper support for the changing needs of our society. Graduates from our department will be eager to start their own business while, with the support of the "On-Field Applying Center", opportunities like part-time jobs and internships will also be provided so our graduates can take positions in organizational work settings.

**"my choice  
ISTANBUL AYDIN UNIVERSITY**

"Our fellow students enable our foundation to have a qualified and young work force by making real what they have learnt in lectures with the project of on-site application as they learn the profession quicker by working at our facilities."

ART MANAGEMENT ♦

---

DRAMA AND ACTING ♦

---

VISUAL ARTS ♦

---

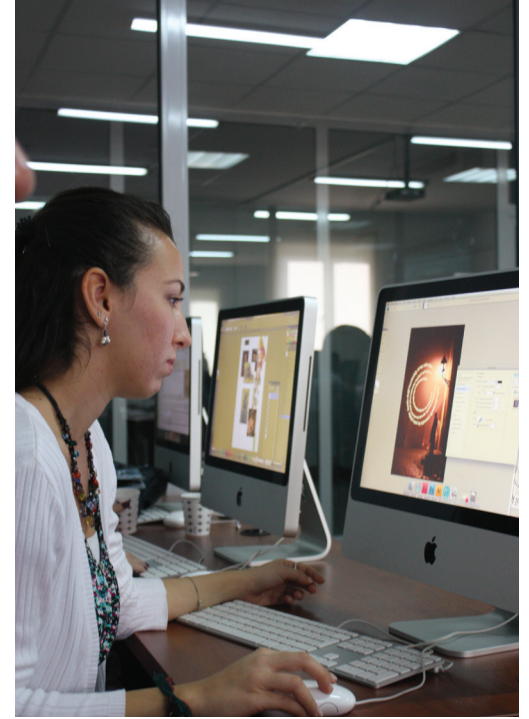

### FASHION AND TEXTILE DESIGN

Graduates of our department can work as designers in firms that furnish services in the textile sector in national and international firms. Besides this, they will have the opportunity to market with their aesthetic and artistic quality in world markets of national and international firms. There are job opportunities in departments like total quality management, marketing, sales and forming corporate identity which are requirements of the business world.

*Dear students,*

*Istanbul Aydin University Fine Arts Faculty was founded with great self devotion and joy to train in specific branches of art which is a part of modern life in the past and today. You will see and experience how effective, how indispensable and how great a source of happiness art is. Because you will be creators of aesthetics with the designs you will make by using your talents after you discover them. Besides this, creativity and design are indispensable units in our country's developing industry and technology. You shouldn't have any doubt that you will be proud of the branch you have chosen and have great success.*

*I wish you great success and send my love to you all.*

**Doç. Oğuz HAŞLAKOĞLU**  
Dean

### GRAPHIC DESIGN

The aim of the department is to train genuine and creative graphic designers who are trained in the ways of aesthetics, culture, art and techniques and are able to blend the information and communication structure of our century in all the disciplines included in the graphic design scope. The education program is a modern and powerful one that is prepared in a way to fulfill this purpose. The four-year education program can be seen below: The graphic designers who graduate from their department can find job opportunities in advertisement agencies, graphic art factory plants, in the areas of printing and publishing in private and public institutions. Besides this, they can make a career in their field (master and postgraduate degrees) as well as find jobs in academia.

### ART MANAGEMENT

Trained in our department, graduates of the Management of Performing Arts Program have significant opportunities in working in the private and public sectors, music, sport, culture and art organizations and in the museum and production sectors.

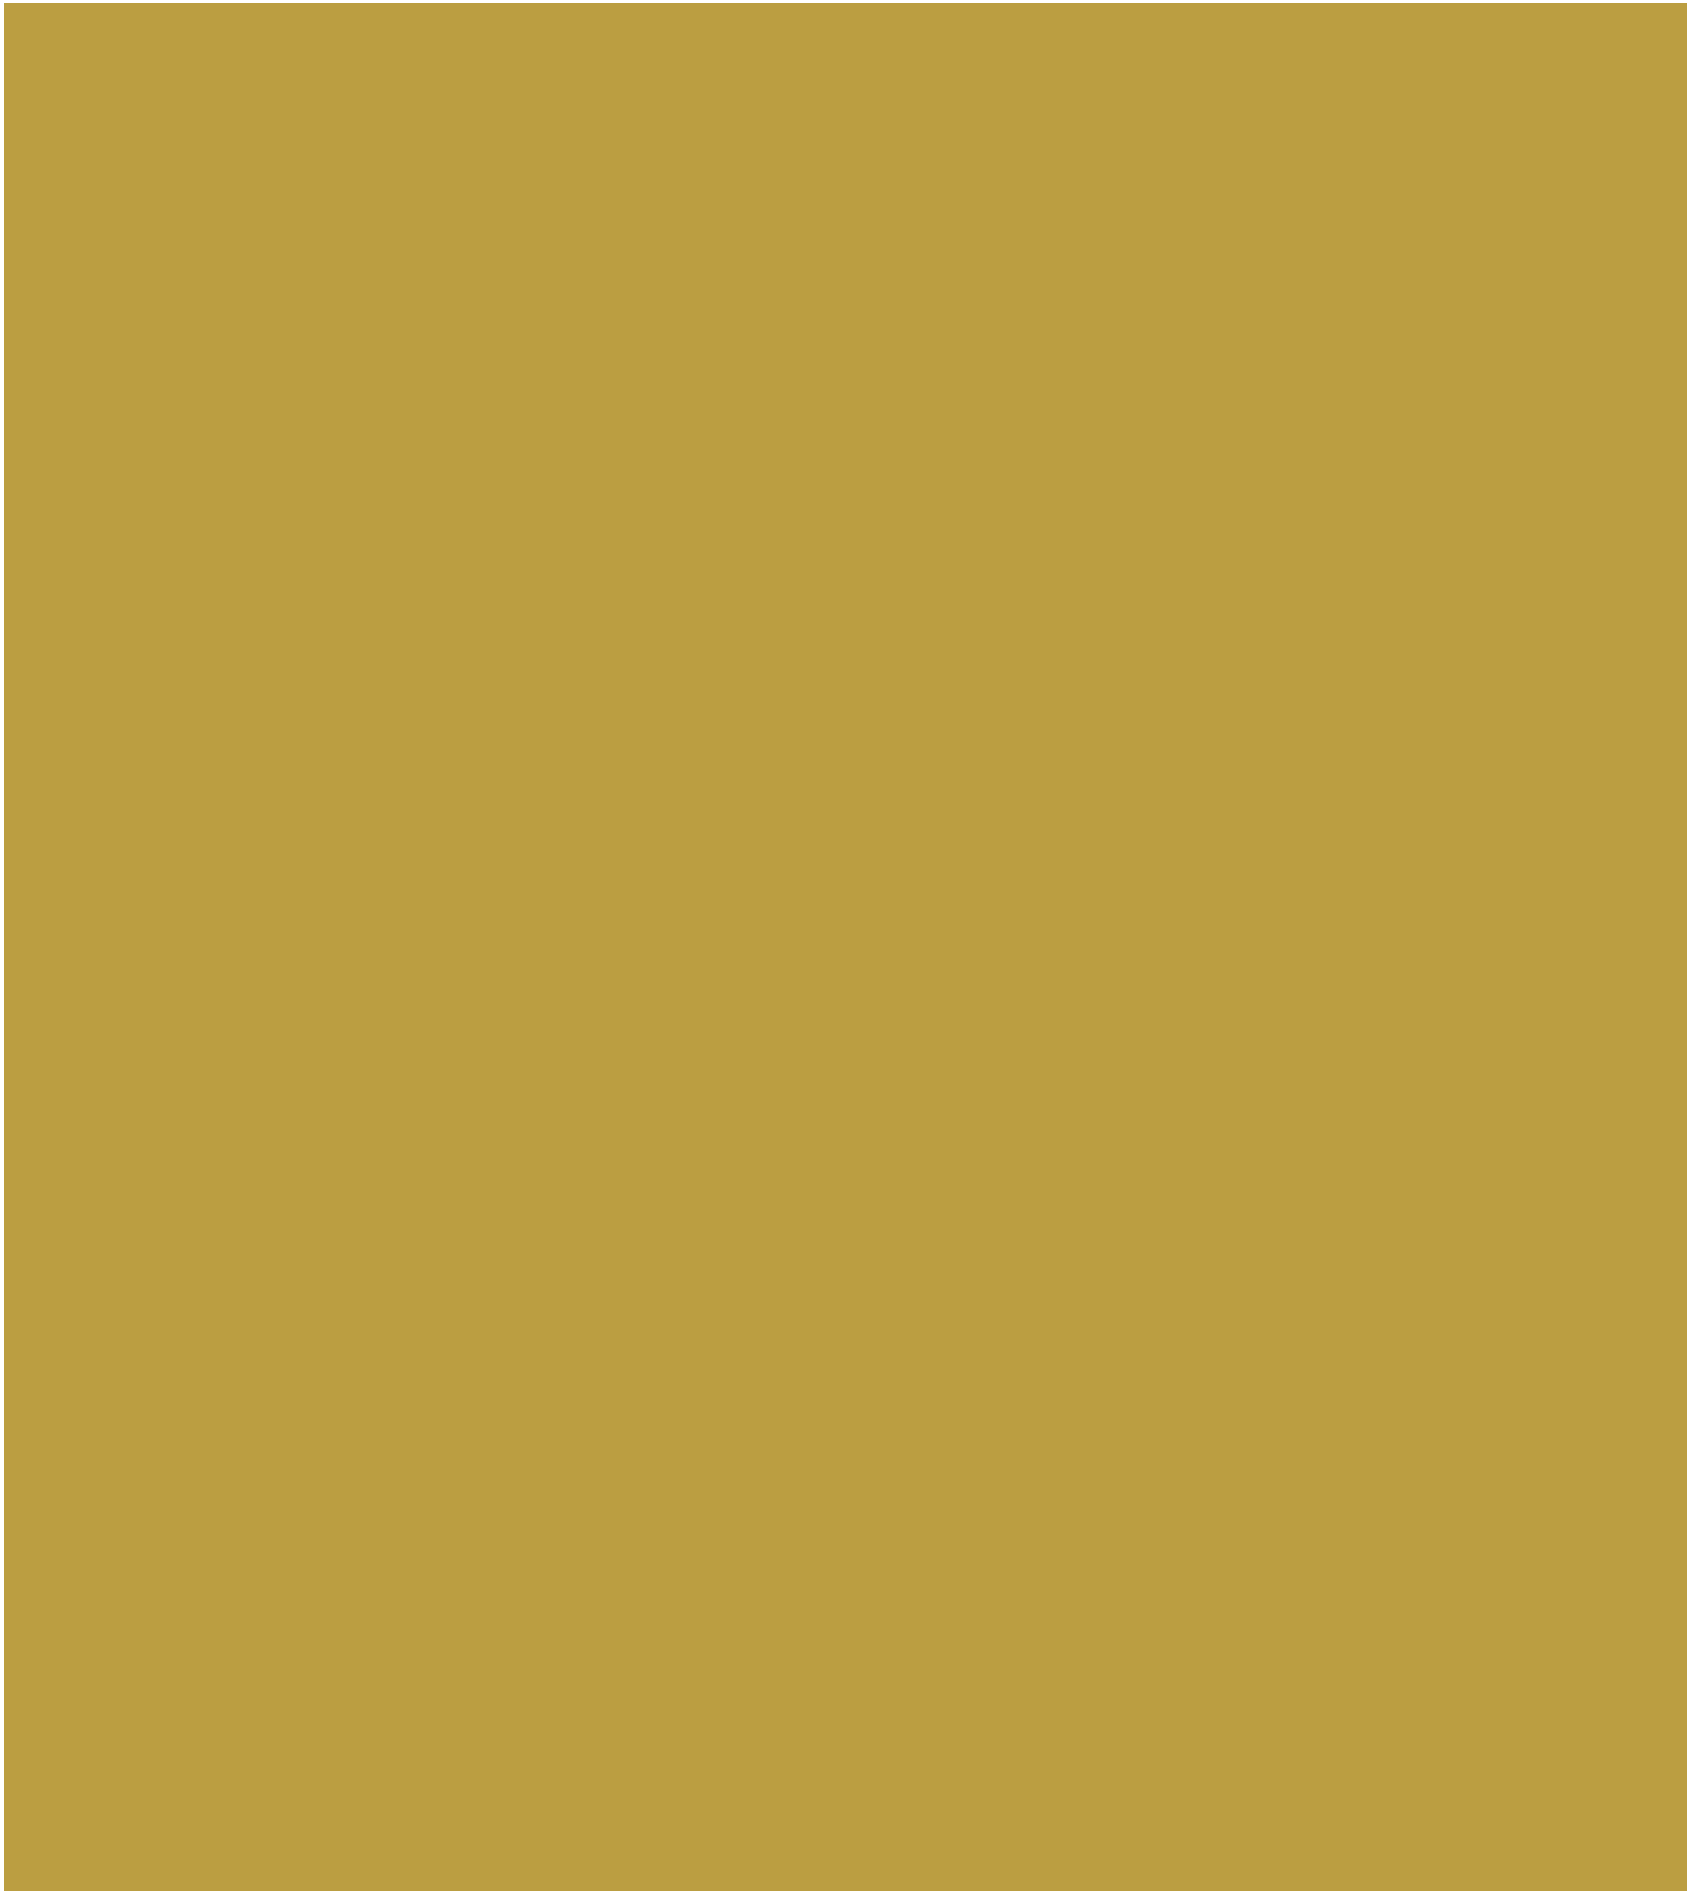

### DRAMA AND ACTING

Today, the art of drama and acting is dominated mainly by private sectors. Therefore, employment is mainly in the private sector.

### VISUAL ARTS

Visual Arts Department will open in Fall 2012 in order to educate artist candidates, who have the necessary knowledge, talent, and competence at collective applications as well as individual capacities, joint projects, networking within the disciplines in the fields of painting, sculpture, and multimedia. Among others goals are; enriching the Education experience with exhibitions, events, and social projects, which will create close relations with art and society as an influence of the university at the cities itself.

# FACULTY OF LAW

---

LAW ♦

---

Istanbul Aydın University Faculty of Law as well as its classical law education, has the professional staff and experience to turn its students into wanted jurists and make them a major in the fields :

- International Law
- European Law
- Environmental Law
- Law of the Sea
- Energy Law
- Competition Law

*Dear students,*

*After a challenging race, you have fulfilled your dream and taken your first step towards a career which will help you to have a vision, status and change your point of view on financial, social, cultural, technological concepts and events. I congratulate you in the name of Istanbul Aydın University Law Faculty Academic staff.*

*We will make a great effort with all the academic staff to help you become a jurist and a successful lawyer ; all our attention will be on you.*

*In our faculty, on one hand, you will have classical legal education to form your normative judicial knowledge, to develop your ability to comment and enrich your intellectual background; on the other hand, you will have the opportunity to analyze and evaluate the nascent law areas, changing and developing juridical values in parallel with political, financial, social, cultural and technological developments and changes.*

*With all these emotions, I welcome you to the ocean of law which we will dive into together and wish your steps towards a respectful job will be beneficial for our country, your family and you.*

**Prof. Dr. Yavuz KAPLAN**  
Dean of Law Faculty

It is aimed that our students will reach a level of English which will enable them to use it in the most efficient way as they will take Business English classes during their law education.

In the Faculty of Law, students are taught practical law aimed at the basic areas of law terminology, basic principles and normative information, techniques, understanding and interpreting the rules, the ability to analyze legal issues and to identify the questions of law they need to know as legal practitioners in the future.

Our students are trained in thinking, reasoning, cause-effect relationship-building, analysis-synthesis, and developing their ability of oral and written expression. On the other hand, they are given adequate training in other areas of social science which are closely related to legal science to increase their intellectual background.

Faculty of Law graduates can perform many tasks including the political and social responsibilities, authority, use and / or may have as a status. Lawyers can act in almost all aspects of social life and levels of government. First of all, they can only be Faculty of Law graduates, judges, lawyers and notary professionals.

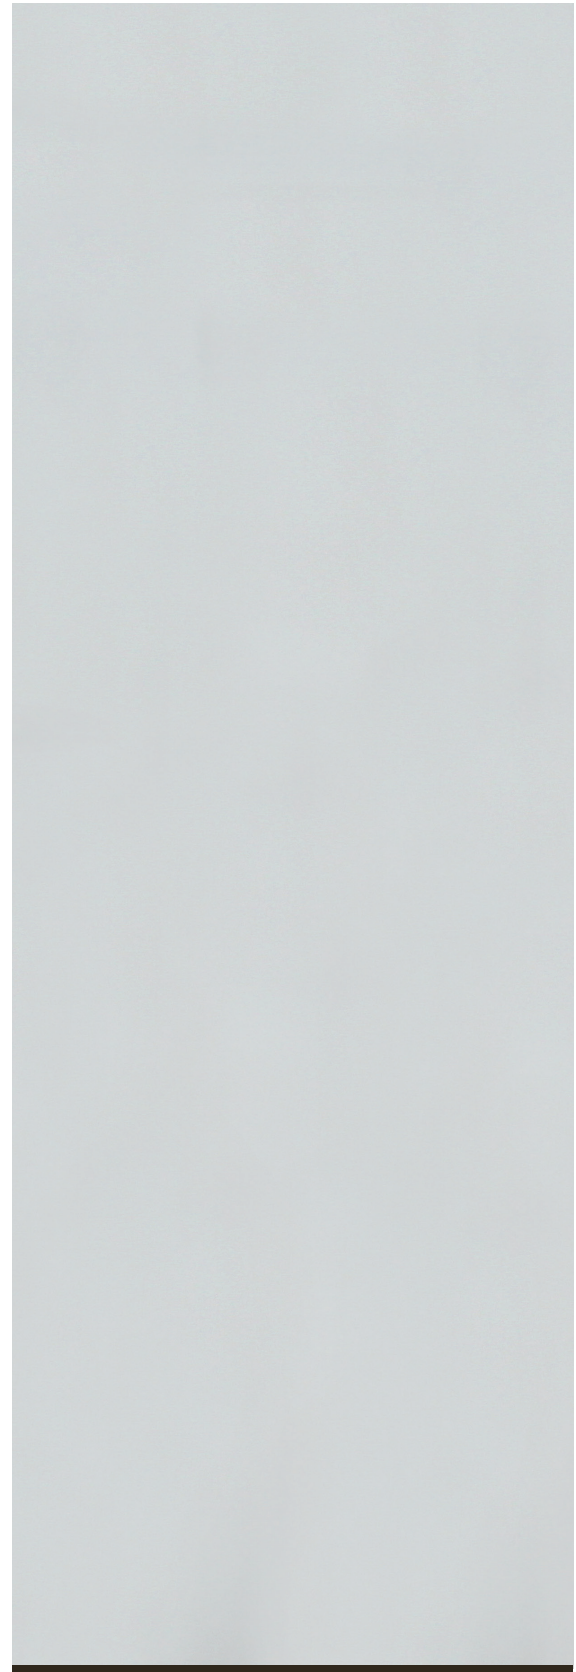

They can serve at all levels of political parties, MPs, ministers and so on. In political life, they can be the safety member, the governor, secretary, administrator, and so on. In the central and local government at all levels of government, the president or members of the local governments, various departments of state-owned enterprises, or in an administrative capacity as a member of associations, foundations, trade unions and other social organizations, members of the board of directors, general managers, auditors, legal experts or consultant advisers and so on.

In addition, they can work at the Supreme courts such as the European Court of Human Rights, the Judiciary, the higher judicial organs, the Ministry of Foreign Affairs from the professional civil service up to the embassy.

**“a powerful university  
which believes in a brighter future...”**

“We train our graduates as qualified and well-equipped individuals while our academic staff are experienced names dominating our country’s economy and hence are the most powerful part of our education.”

*Dear Students,*

*The Faculty of Economics and Administrative Sciences of Istanbul Aydin University aims to train the future economists and managers of the Turkish economy in order to improve its development, which is in the process of full privatization and integration into the world economy. In addition, the faculty aims to teach the students the basic rules and principles of the competition, markets and foreign trade as the entrepreneurs of the future with its own graduated specialist and expert economists and managers. The faculty functions are not only as a foundation for training, but also a guide that will function to enlighten our society. Furthermore, the faculty, as a developing institution, has dedicated itself to cooperate with different sectors and markets. With the university business cooperation, we not only plan to have job possibilities available, but also we place great importance in finding students permanent jobs after graduation. To sum up, any student under the roof of the Faculty of Economics and Business Administration is our focus in a lifelong learning process. A cooperation protocol has been formed between the University of Maryland University College and Istanbul Aydin University for Business Administration (English) that gives the opportunity to have a double diploma for the first time in Turkey. The program provides educational opportunities to students and lecturers in the USA's 18th and the world's 39th best university.*

**Prof. Dr. Ömer GÜRKAN**  
Dean

### **BUSINESS ADMINISTRATION**

The aim of the department is to educate and train students in advanced entrepreneurial skills that seek opportunities in order to establish their own business, and also equip them with knowledge and skills that are necessary to take managerial positions at different levels and departments of national and international businesses, and which aims to help them to develop themselves and apply what they have learned. Graduates can set up and operate their own business or can work as top executives in different businesses or work as managers in different departments (production, operating, marketing, sales, purchasing, advertising, finance, human resources, public relations and research and development) of companies or work as specialists such as training specialists and managers, financial analysts, financial advisors, accountants, auditors, financial advisors in companies, banks, and other organizations.

### **BUSINESS ADMINISTRATION (ENGLISH)**

The aim of the department is to educate the student and help them to be ready for professional life by having theoretical knowledge with practical experience in a very competitive market. We ask students to gain knowledge in economics, law, management, trade and be competent in the fields of economics and trade.

Graduates of international trade can be employed in some firms dealing with foreign and international trade, export and import

departments of local or regional firms, in banks, in logistics firms and in the insurance sector.

### **POLITICAL SCIENCE AND INTERNATIONAL RELATIONS (ENGLISH)**

Students will be given historical and current knowledge and case studies about the subjects. Therefore, they will be able to understand socio political transformation, foreign policy and diplomacy, conflict, conflict resolution, global treats, political economy and international strategic management. A special emphasis is placed on "strategy and strategic thinking in the concept of international relations" within the department as a special studying field.

Graduates from the department can find job opportunities in the Turkish Foreign Ministry, Strategic Research Centers, national or international organizations, public and private sectors and in the universities as academic staff.

### ACCOUNTING AND FINANCE MANAGEMENT

In the department, first, we aim to give the basic rules of accounting and finance and practical training later. Besides this, in the program financing public and private enterprises are focused on with a new approach. The program is organized in two different ways and the students are trained both in a theoretical and applied way so that they become familiar with the market economy. Graduates finish the department by being competent with accounting terms and can work as an accountant or financial advisor. Either they can work for public and private firms such as banks and insurance companies in the accounting and finance department as a financial expert, auditor or manager or they can open their own business as financial advisors. The diploma and the knowledge of accounting and finance will be an asset in all sectors of the economy and in the international market.

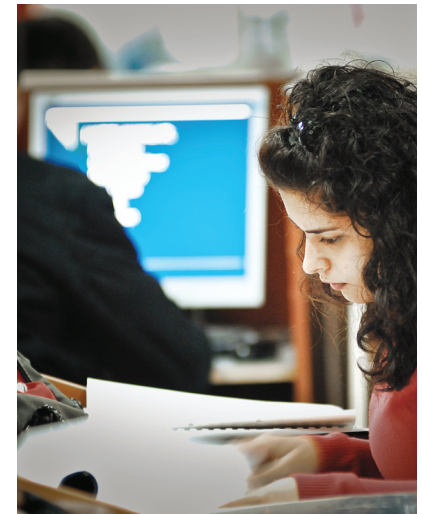

### ECONOMICS AND FINANCE

The Economics and Finance Department educates students towards the needs of the free market economy by applying both theoretical and practical courses. Graduates can get a position in public and private sectors and in some international firms after having completed four years education. The aim is to place the graduate in some top companies in the finance sector as a finance expert, manager and vice manager.

### INTERNATIONAL TRADE

Students will be given historical and current knowledge and case studies about the subjects. Therefore, they will be able to the

understand socio political transformation, foreign policy and diplomacy, conflict, conflict resolution, global threats, political economy and international strategic management. A special emphasis is placed on "strategy and strategic thinking in the concept of international relations" within the department as a special studying field. Graduates from the department can find job opportunities in the Turkish Foreign Ministry, Strategic Research Centers, national or international organizations, public and private sectors and in the universities as academic staff.

## SCHOOL OF ECONOMICS AND ADMINISTRATIVE SCIENCES

(DUAL DEGREE BUSINESS  
ADMINISTRATION PROGRAMME)

### BUSINESS ADMINISTRATION

**Double Diploma Bachelor's  
Degree Program (4+0)  
University of Maryland University  
College (UMUC), USA**

The aim of this dual degree project, which is uniquely offered in Turkey by Istanbul Aydin University, is to make the greatest possible number of students take advantage of these opportunities by making international educational opportunities in Business Administration close and accessible as much as national education. This project is of great

importance in terms of providing our students who do not or cannot go abroad with a variety of reasons, and so receive a share of international educational opportunities.

On one hand, having HEC-approved double-degree and excellent English, on the other hand having an international education without leaving his family, his friends, not paying apart from the tuition fee charge, is a unique opportunity.

A special project approved by the Council of Higher Education was formed by combining the curriculum of IAU Business Administration department with UMUC degree program in the Business Administration curriculum.

UMUC was founded in 1947 in a state which is famous for its universities; Maryland is one of the top 100 universities in the United States. It is among the 11 universities within the University System of Maryland and it is among the world's top 100 institutions of higher education. Apart from the state it was founded in, it has many training centers in many states of the USA, especially in Washington. It is also very good at distant education.

The language of instruction is English and a minimum TOEFL score of 550 is required to be accepted. Students who do not speak English well enough, will attend a 1 year preparatory program at IAU.

**Political Science and International Relations  
Dual-degree undergraduate program (3 +1)  
Middlesex University, UK**

This program started with a special project approved by the Council of Higher Education and is formed by combining the curriculum of IAU Business Administration department with UMUC degree program in the Business Administration curriculum. It will enable its students to gain two diplomas, one from IAU, the other from Middlesex University. Political Science and International Relations, one of the most popular and open disciplines for advancement in terms of both academic and professional aspects, offers an international insight. After completing the first three years in IAU, the students will then go to London for the final year and they will get double diplomas from Middlesex University.

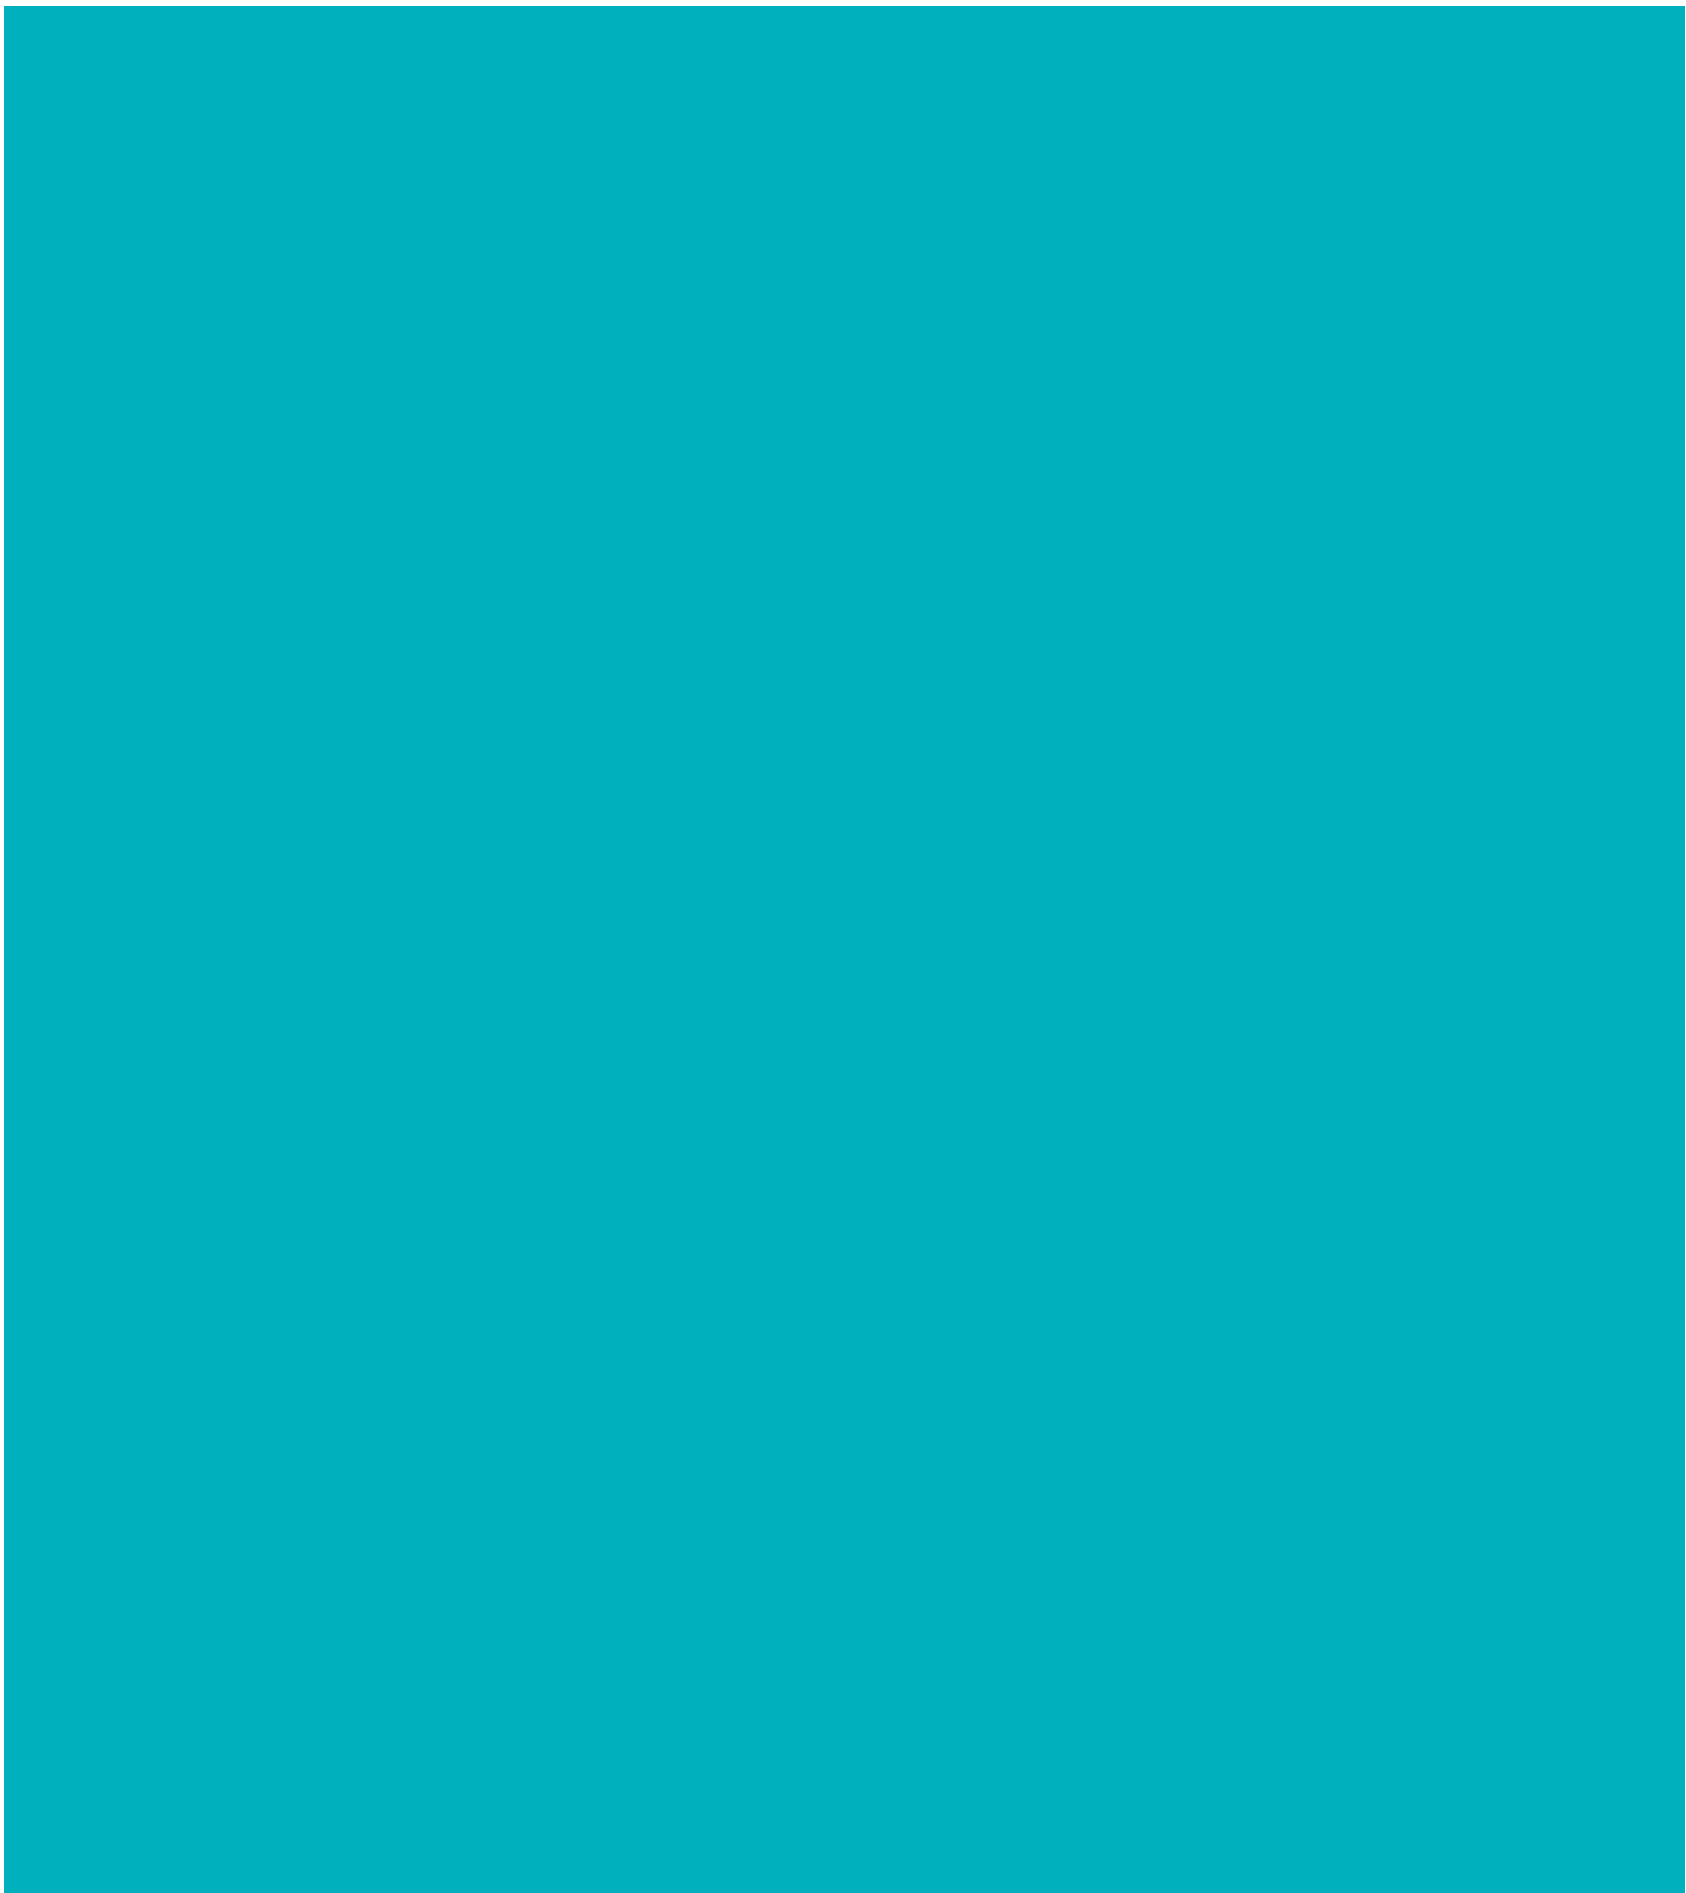

International students constitute 30% of students studying at Middlesex. It was awarded for the Queen's Award for Enterprise as it is the first university in England which established its record network open to the world.

Besides this, it has a certificate of achievement because of its initiative promoting student's improvement from the QAA (Quality Assurance Agency). An IELTS minimum of 6.5 points must be provided for entry to this program whose language of instruction is English. Students who do not speak English well enough will attend the 1 year preparatory program in IAU.

This program has the necessary permissions and from the 2011-2012 academic year students will be accepted.

# COMMUNICATION FACULTY

---

VISUAL COMMUNICATION DESIGN ♦

---

RADIO, TELEVISION AND CINEMA ♦

---

JOURNALISM ♦

---

PUBLIC RELATIONS AND PUBLICITY ♦

---

*Dear Students,*

*Istanbul Aydin University Faculty of Communication 2000 students will leave their mark on the communication sciences engaged in the areas of theory and practice of teaching an institution.*

*Public Relations and Publicity, Journalism, Radio, Television and Cinema, Visual Communication and Design are taught in the department of the Faculty of Communication. We have expert, outstanding teaching staff, respect for human rights, and aim to educate individuals to be sensitive to social problems.*

*We call on all young people for a successful career.*

**Prof. Dr. Hülya YENĞİN**  
Dean of the Faculty of  
Communication

### **VISUAL COMMUNICATION DESIGN**

It is targeted to train designers who follow changes and innovations in communication tools, who can use visual elements as an efficient communication tool.

### **RADIO, TELEVISION AND CINEMA**

In this department, it is targeted to train students who blend theory and application with science, art and technology and show their creativity. Graduates work in areas such as radio, television, film industry, producing, radio-television programming and journalism, film directing.

### **JOURNALISM**

The main objective of the department to train journalists who value public interest. Graduates find the opportunity to work in the field of journalism proliferating internet, press agencies, as well as within the scope of today's communications technologies.

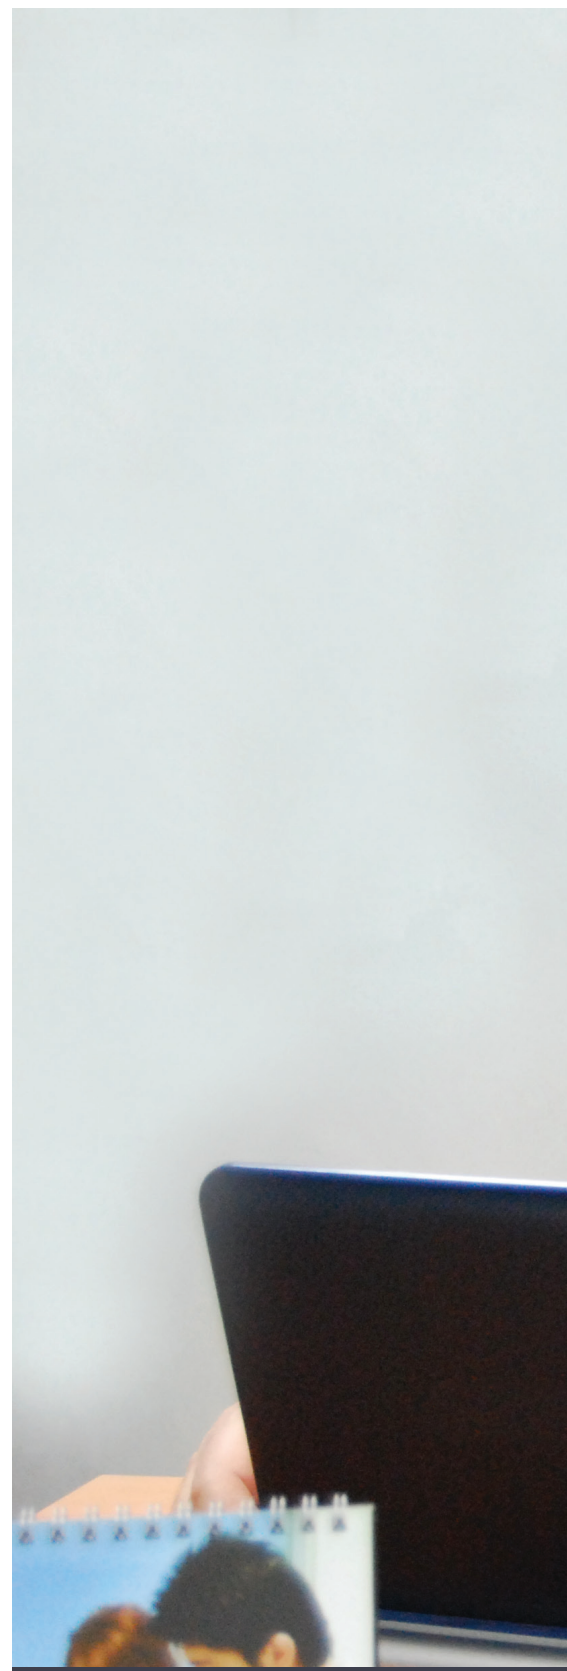

### **PUBLIC RELATIONS AND PUBLICITY**

In this department, public relations specialists and advertisers acting with a sense of social responsibility, responding to the needs of our time are targeted to be trained. Graduates can work as public relations and media planning specialists, advertisers in the sector.

**“powerful university  
which believes in a brighter future”**

“We present our global education insight with foreigner academic staff who share their international education experiences and who studied at the most prominent universities in the world to the students.”

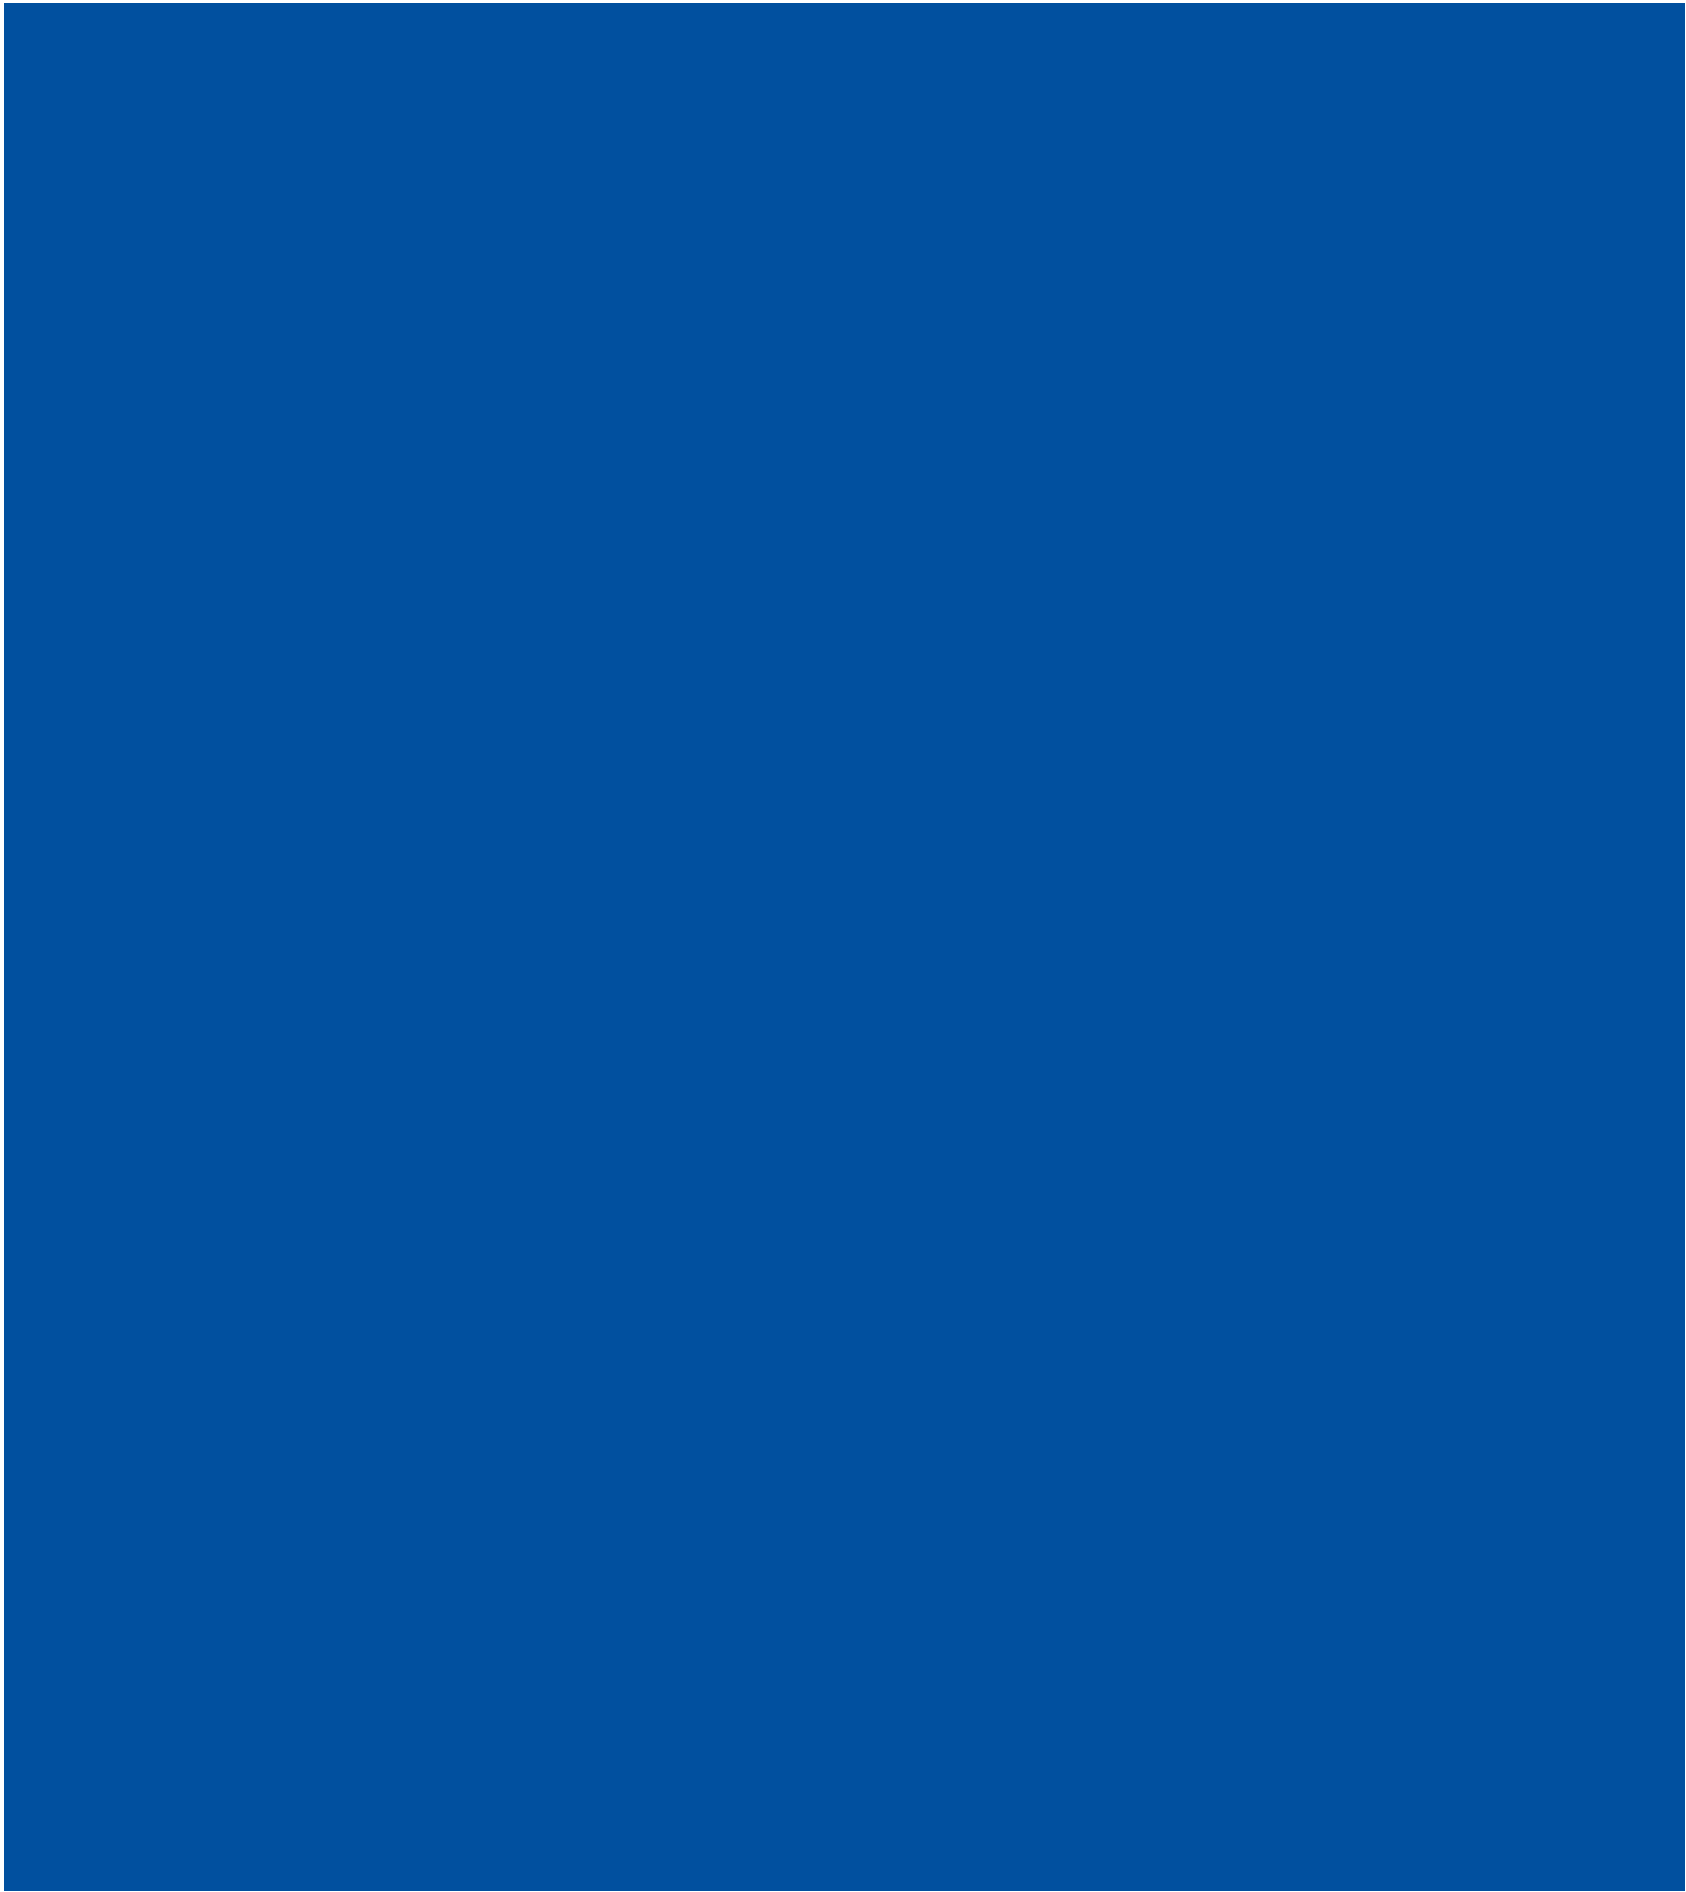

*Sotiris Giannakakis, IAU Academic Member*

*Dear students*

*I welcome you to as you are in the preparation to take step to the education in a field which is rooted, elite and respected department of Engineering and Architecture taking place between art, culture and technology.*

*We summarize our vision of Engineering and Architecture as “ training young engineers and architects who value their own cultural values, respectful for environment and humanity and who can produce creative solutions for the problems and demands of community about engineering and architecture”. Basic Theory / Cultural, and production / construction technology courses in the workshop / studio which is based on the principle of integrating environment education programs, supported by intensive computer applications.*

*Programmes are in English or in Turkish focused on English. Our programme consists of academicians with international education experiences and who studied at the most prominent universities in the world.*

*Our university is your home; it is the extension of your living place; it is matter of fact that your home is also the extension of your university. We should share our non-academic happiness and troubles as well as academic ones, we shoul create a love and tolerance environment as well as knowledge and skills.*

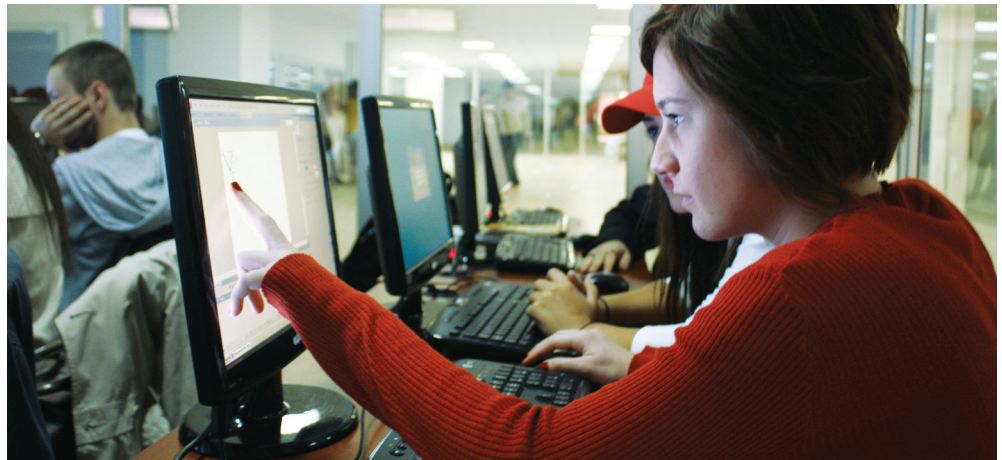

*I believe that we will be successful in this context, I offer you all my love, I say welcome, I wish you success.*

**Prof. Dr. Osman Nuri UÇAN**  
Dean

## **ELECTRICAL AND ELECTRONIC ENGINEERING**

It is divided into two main branches: one of these is Electric : high-voltage, energy and power systems, the Electronics; telecommunications, biomedicine, robotics and a wide range of issues. Software and hardware education is given importance in the department.

The Department of Electrical and Electronic Engineering of scientific publications by faculty members / studies / projects; robot technologies (Example: Remote control robot), wireless network optimization (Example: Military communications applications), encryption / Encoding (Example: Channel and source environments- the encryption / encoding algorithms with error performance optimization), artificial intelligence applications (Example: facial recognition, fingerprint recognition, signature recognition, extraction, fault maps, areas of archaeological site

examination), Biomedical applications (Example: Colon, lung, breast cancer diagnosis, etc., osteoporosis, preliminary diagnosis of diseases such as schizophrenia) examined.

## **ARCHITECTURE**

Formal and special architectural and construction firms which can respond to the needs of rapidly developing, planning and design and structural firms in which our graduates can find jobs. on the other hand, our university which encourages free entrepreneurship aims to be the router for our graduates who want to open their personal offices.

## **SOFTWARE ENGINEERING**

This department was established to bring up young software developers who will work in line with the mission of developing broad scale software necessary for Turkey within the country in a safe way and to develop the software to be used in the areas which are increasingly becoming more important such as subways, airport management, nuclear reactor management, defense and similar sectors with the poka yoke techniques.

## **COMPUTER ENGINEERING**

Purpose of the Computer Engineering Department is to bring up young engineers who are endowed with contemporary information; can do research on development of the computer systems and have adopted the principle of enabling humankind to benefit from computers more efficiently.

## **FOOD ENGINEERING**

The purpose of Food Engineering is to produce graduates for continuous monitoring of emerging food science and food processing techniques, the techniques of interpretation for production optimization, food safety and food quality, increasing direction, and to uncover the use of innovative products and manufacturing techniques. Food engineers can work as engineers in various public agencies as well as the food industry's research and development, production, quality of assurance, marketing, import and export areas.

### INTERIOR DESIGN

Interior Design is a department which arranges interior design and furniture arrangements and train interior designer in this regard. Graduates who organize interior design regulate each scale and makes applications are qualified to work in cooperation with domestic and international organizations.

### INDUSTRIAL ENGINEERING

Amongst the graduates of all engineering branches, they have the most flexible and diverse options, they have career opportunities as engineers, method engineers, quality control manager, human resources manager apart from finance and Information Technologies industries.

### MECHANICAL ENGINEERING

Manufacturing of all kinds of mechanical equipment, maintenance and repair, business organizations and institutions, factories, mechanical engineers can find career in these business areas.

### TEXTILE ENGINEERING

There is a career opportunity and room for expansion in Textile industry, from raw material to finished product in the field of production of all kinds, (spinning, weaving, finishing, garment) textile engineers and pending free entrepreneurship.

### CIVIL ENGINEERING

The purpose of the start-up section of Civil Engineering is to train the graduates as individuals who can use the basic concepts required in each case, grasp the application and adapt to the changes.

The primary targets of Civil Engineering Department, both public and private sector, in their

- International and national-to-date grasp of applications
- That can follow changes in the application
- New technological applications that adapt easily
- Being aware of the new materials to conventional materials
- Social sensitivity
- Respect for cultural heritage
- Environment-friendly
- Aware of global, as well as of the local
- Communication skills developed
- Ethical concepts internalized
- Team leadership skills, but also prone to run advanced to train professionals.

### Department of Civil Engineering graduates can work at both public and private sectors,

- All types of engineering structures, in other words, all the necessary infrastructures for urbanization and bridge, highway, railway, tunnel, airport, port
- Drinking water and irrigation water supply and distribution, drainage and sewage networks, water treatment facilities
- Power generation, irrigation and dam and pond areas to protect against natural disasters designer, enforcement, control, and different definitions of employment as a contractor.

### MECHATRONICS ENGINEERING

Mechatronics Engineering is established to fill in the technological gap between Electrical and Electronic Engineering and Mechanical Engineering. The purpose of mechatronic engineering is to grasp the requirements of industry and contemporary analytic thinking. The main topics cover the concepts of Electrical and Electronics Engineering, Mechanical Engineering such as automatic control, robotics, artificial intelligence applications, circuit training aimed to design a level of hardware and software. The high technology based laboratories will help us to follow current developments of the considered subjects. The laboratory facilities include robotics, CNC machine tools, advanced software and hardware compatible environments.

“it is a university  
that believes in a brighter future”

“Since our establishment, we have graduated 12.000 students to a brighter future in the business world. We are proud of all of them and we thank our academic staff for their contribution to the training of our students.”

*Pioneer in Education, Leader in Success*

# THE SCHOOL OF FOREIGN LANGUAGES

One of the indispensable conditions of modern life is using foreign language for both professional and personal purposes. İstanbul Aydın University ,The School of Foreign Languages accept the basic principle in line with the strategic goals and objectives of students on a professional and Business English, including the best way to teach a language, to recognize and to use. For this purpose, faculty members provide trainings on professional and academic teaching of English and foreign language literature in the field of education and vocational programs and content of the courses are continuously monitored and updated according to their fields.

With the objectives like openness to the world and integration, İstanbul Aydın University prepares to make the academic programs offered by the majority of students in various foreign languages, mainly English. This will enable all the students who graduate from their field to, other than being good with professional equipment and a diploma, learn at least a foreign language.

Istanbul Aydın University School of Foreign Languages, offers Foreign Language Preparatory Programs which include English, Russian, Spanish classes. We offer the chance to learn the most common languages spoken to both new beginners and those who want to improve the language they already speak.

The main philosophy is: 'The language that you can not use is not yours' English Preparatory Program composes of two semesters lasting four separate tracks. English language students who enrolled in the program are assured of learning the best way to use each type of infrastructure available. Students make use of multi-media classrooms, e-beam and smart boards in classrooms. And around the clock, satellite broadcasts reach considerable benefit(s) from audio-visual language laboratories. On the other hand, the language training program that is integrated into CALL (Computer Assisted Language Learning) courses makes it possible to study and practice not only at home but also in the classroom.

English Preparatory Program curriculum is completely student-centered. Each student may enter at the end of the year and the final exam will be evaluated in parallel of the TOEFL-iBT exam. Program A, B and C are three basic levels of language training. Students, if they so desire, could complete the 3rd and 4th track abroad.

School of Foreign Languages carry out the university graduate and undergraduate programs in all the following; general, professional, business English and private /academic purposes. In addition, Applied English, Russian and Spanish Translation programs, as well as the opening of the academic support programs is intended to give the other interpreters and foreign language instructor a higher level of education plus co-operation with chief of departments.

**Prof. Dr. Veysel KILIÇ**

Director of School of Foreign Languages

### Computer Programming

#### Computer Programming (English)

##### The Purpose of The Program

This program trains qualified personnel every day in the field of IT, both theoretical and practical skills, to respond quickly to the increasing need.

##### Practice Areas

Our students can work in different fields like software companies, marketing and technical support for computer companies, insurance companies, banks, commercial institutions, Internet service providers, Internet publishing companies, radio, television, stock exchanges and transportation. They can also work in computer training, marketing, consulting, or work in their own jobs.

##### Inter-departmental Transfer Programs

Computer Programming (Turkish), Computer Programming(English), Computer Programming (UOÜLP-Hackney Community College, England 1+1) Computer Technologies (English), Information Security Technology (English)

##### Vertical Transfer Programs

Information Technologies, Computer –Informatics, Computer Sciences, Computer Engineering, Computer Teaching, Teacher of Computer Systems, Computer Technologies and IT systems, Computer and Informatics System, Computer and Control Teaching, computer and Technologies Teaching, IT Engineering, IT Technologies and Systems, Electronics and Computer Teaching, Informatics Technologies, Statistical Physics and Computer Science, Control Teaching, Mathematics and Computer, Meteorological Engineer, Applied Mathematics and Computer, Aerospace Engineering, Software Engineering.

### Computer Programming (English)

##### The Purpose of The Program

Therefore these processes are based on information technologies. These very fast, young people will be trained in these areas and provided latest information technologies, as well as changes in technology, so as soon as possible, and trains personnel for the goal of the department.

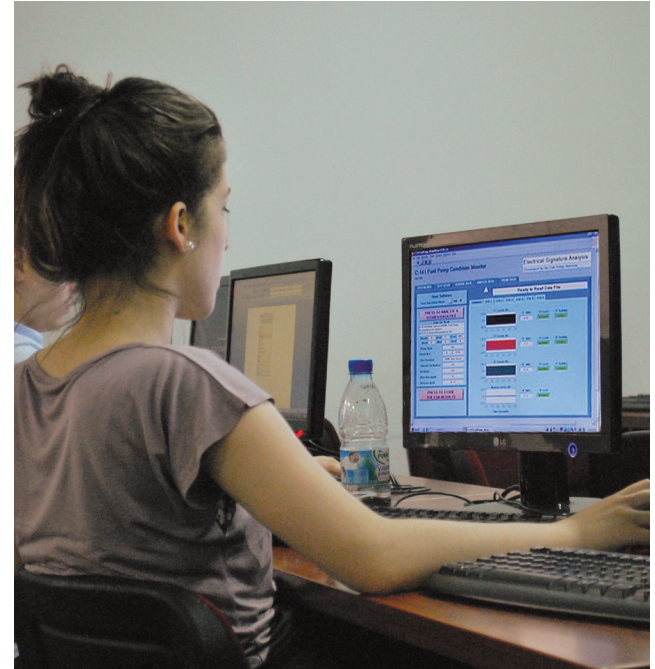

### Computer Programming (Distance Education)

##### The Purpose of The Program

This program trains qualified personnel every day in the field of IT, both theoretical and practical skills, to respond quickly to the increasing need.

##### Practice Areas

Our students can work in different fields like software companies, marketing and technical support for computer companies, insurance companies, banks, commercial institutions, Internet service providers, Internet publishing companies, radio, television, stock exchanges and transportation. They can also work in

computer training, marketing, consulting, or work in their own jobs.

##### Inter-departmental Transfer Programs

Computer Programming (Turkish), Computer Programming (English), Computer Programming (UOÜLP-Hackney Community College, England 1+1) Computer Technologies (English), Information Security Technology (English)

Information Technologies, Computer – Informatics, Computer Sciences, Computer Engineering, Computer Teaching, Teacher of Computer Systems, Computer Technologies and IT systems, Computer and Informatics System, Computer and Control Teaching, computer and Technologies Teaching, IT Engineering, IT Technologies and Systems, Electronics and Computer Teaching, Informatics Technologies, Statistical Physics and Computer Science, Control Teaching, Mathematics and Computer, Meteorological Engineer, Applied Mathematics and Computer, Aerospace Engineering, Software Engineering.

### Computer Programming

#### Dual Degree Program

#### (UOÜLP-Hackney Community College / England)

##### The Purpose of The Program

Information and application of international standards. It provide students the opportunity to find a job anywhere in the world and offer information and application of

international standards. The Double degree diploma given to students will give them advantage not only in terms of giving them an edge when applying for a job in Turkey but also open the door to the world of job opportunities in many countries. This program will be given in English. Students spend their first year in ABMYO, and then attend the second class in Hackney Community College. Apart from getting a dual diploma from the world proclaimed Hackney Community College situated in London, the graduates of this program will also get Edexcel diploma from Edexcel which is approved by the international world accreditation body based in England. This program is in English. As a characteristically necessity of a dual degree program, it is required that an IELTS score of 5.5 or more is achieved.

### **Practice Areas**

Edexcel, the international approval processes, especially for vocational programs is a system applied by not only by higher educational institutions only, but also the real sectors in cooperation with companies. And, there is also a close relationship, particularly in the certificate sought by businesses. Business owners find it much easier to create opportunity.

### **Inter-departmental Transfer Programs**

Computer Programming (Turkish), Computer Programming (English), Computer Programming (UOÜLP-Hackney Community College, England 1+1) Computer Technologies (English), Information Security Technology (English)

### **Vertical Transfer Programs**

Information Technologies, Computer –Informatics, Computer Sciences, Computer Engineering, Computer Teaching, Teacher of Computer Systems, Computer Technologies and IT Systems, Computer and Informatics System, Computer and Control Teaching, Computer and Technologies Teaching, IT Engineering, IT Technologies and Systems, Electronics and Computer Teaching, Informatics Technologies, Statistical Physics and Computer Science, Control Teaching, Mathematics and Computer, Meteorological Engineer, Applied Mathematics and Computer, Aerospace Engineering, Software Engineering.

### **Computer Technology (English)**

#### **The Purpose of The Program**

The processes which are especially based on information technologies are developing and changing very fast. Therefore, the purpose of this department is not only to give the latest information Technology but also to train people who can learn and apply these principles in the shortest time.

### **Practice Areas**

All organizations with multi-user computer systems, all the agencies that is, the internet and electronic carriers, mail service, computer network, all of the organizations, all organizations engaged in electronic commerce, distance education, etc. of all organizations. will have the opportunity to easily work in places like.

### **Inter-departmental Transfer Programs**

Computer Programming (Turkish), Computer Programming (English), Computer Programming (UOÜLP-Hackney Community College, England (1+1) Computer Technologies (English), Information Security Technology (English).

### **Vertical Transfer Programs**

## **DEPARTMENT OF OFFICE AND SECRETARIAL SERVICES**

### **Office Management and Executive Assistant**

#### **The Purpose of The Program**

Office Management and Secretarial Training program is one of the work areas that this country needs and lacks most. Therefore, this program aims to educate administrative assistants, office managers and office professionals who meet the needs of the rapidly changing and evolving business world. Furthermore, they are equipped with the knowledge and skills, can use at least one foreign language effectively, contribute and effectively support the office services, management functions performed by the manager and have management efficiency.

### **Practice Areas**

Office Management and Secretarial Training program graduates serve as an administrative assistant, government agencies and offices of private enterprises, office manager and office services specialist.

### **Inter-departmental Transfer Programs**

Banking and Insurance, Foreign Trade (in Turkish), Foreign Trade (English), Real Estate and Property Management, Public Relations and Presentation, Human Resources Management, Business Administration (Turkish), Business Management (English), Logistics, Accounting and Tax Practices, Hotel and Tourism Management, Marketing, Management of Health Institutions, Local Administrations.

### **Vertical Transfer Programs**

Public Relations, Public Relations and Advertising, Public Relations and Presentation, Business Information Management, Advertising and Public Relations, Health Care Management, Management Information Systems.

**"our choice is  
ANADOLU BIL VOCATIONAL SCHOOL"**

"Anatolian BIL Vocational School is an academic institution which has advanced perfection on competitive advantage and private sector organizations, better understanding and analyzing the expectations and requirements of providing responsive solution/projects, consisting of modern education in line with contemporary education. As Turkent Food Co. Human Resources Team, all the projects we are working on with Anadolu BIL Vocational School had the comfort provided by this competency. As a team we understood that we prefer the right address to access employees who will carry Turkent Food Co. to the future."

Özlem RODOPLU, Turkent Gıda A.Ş., Director of Human Resources

## DEPARTMENT OF HANDICRAFTS

### Jewellery and Jewellery Design

#### The Purpose of The Program

The aim of the programme is to provide the qualified intermediate staff need that will not cause a loss of time and transmit every type of information blending technological developments which can make a contribution to production in particularly design at jewellery sector. It also aims to educate individuals who can use basic academic and practical information on jewellery, art and basic design and also can evaluate his own studies in arts and design field, determine the learning needs, predefine and interrelate with the target group and transfer the subjects about jewellery field to specialists and non-specialists correctly and has cultural and ethic values, who can see and think and have practical mind and take responsibility as a team member for design and production to solve the problems faced during the implementation about art and design field.

#### Practice Areas

All small and big businesses that function in every field of jewellery sector. and design offices.

#### Inter-departmental Transfer Programs

It is not allowed to make interdepartmental transfer in this department.

#### Vertical Transfer Programs

Jewelry technology and design.

## DEPARTMENT OF FINANCE BANKING AND INSURANCE

### Banking and Insurance

#### The Purpose of The Program

The basic need for human resources trained and equipped with judicial knowledge, in the existing banking and insurance sector with an overview of the directorates and branches throughout Turkey, also depending on the banks of the leasing and other financial and sectoral institutions, is increasing day by day.

#### Practice Areas

Capital Market Intermediary Institutions, Credit Analysis, Banking, Insurance, International Auditing Companies, the Public Financial Institutions, Leasing Companies, Reinsurance Companies, Departments of Finance Companies, for the business sectoral activities such as the sections of small and medium enterprises.

#### Inter-departmental Transfer Programs

Office Management and Executive Assistant, Foreign Trade (in Turkish), Foreign Trade (English), Real Estate and Real Estate Management, Human Resources Management, Business Administration (Turkish), Business Management (English), Logistics, Accounting and Tax Practices, Marketing, Health Care Institutions Management, Tourism and Hotel Management.

#### Vertical Transfer Programs

Actuary, Banking, Banking and Finance, Econometrics, Economics, Economics and Finance, Business Administration, Business Informatics, Business economics, Logistics Management, Capital Markets, Insurance, Insurance and Risk Management, International Finance, International Business, International Business Administration, International Trade, International Trade and Finance, International Trade and Management.

## DEPARTMENT OF FOOD PROCESSING

### Food Technology

#### The Purpose of The Program

At the present day and in the future, engineers, technicians and especially qualified staff who will work with modern and rationalistic approach in food technology field are immensely needed. The lack of staff who has an education on food science will go on as R&D studies, food safety and consumer health stands in the forefront at food industry. It is still a big risk that uneducated staff takes place in the period of purchasing and transferring to the customer in the food production and auditing system. To fill the need of qualified technicians and engineers onwards is possible in case the people who will be occupied in food production chain has a good education level and use this knowledge in a proper and trustworthy way in order to reap the benefits of the consumers and industrialists.

#### Practice Areas

The students who graduate from this department get the title of food technician. The graduates can work in the quality control and production departments of business enterprises in private sector, at laboratories of Ministry of Agriculture and Rural Affairs, in Hygiene Institutes at Municipalities, at Local Health Authority, private laboratories and at prepared food stuffs sector.

#### Inter-departmental Transfer Programs

There cannot be any interdepartmental transfer in this program.

#### Vertical Transfer Programs

Nutrition and Dietetics, Plant preservation, food engineering, chemistry, Agricultural biotechnology.

## Technology of Flour and Bakery

### The Purpose of The Program

The aim of the programme this programme aims to educate well-equipped technicians to produce safe, quality and economical flour and bakery products. The programme also endeavours to carry out modern, scientific and applied education and research with the intention of sharing the produced scientific knowledge with industry and society. The programme's ultimate goals include but are not limited to (1) providing an associate degree with high standards (2) educating its students on flour and bakery products at international standards (3) carrying out research which will contribute to the food industry and produce scientific knowledge which will serve as basis for technological advancement. The students who successfully complete this course will be equipped with necessary and sufficient knowledge of cereal processing which includes pasta, bread and biscuit production, protection of public health and relevant legislative procedures.

### Practice Areas

After graduating, the students will earn the title of flour and bakery products technician. They can work in all fields of the Flour and Bakery Products industry, either in the public or private sector, or supervise production steps such as production techniques, quality control, storing, marketing and business operation.

### Inter-departmental Transfer Programs

Food Technology

### Vertical Transfer Programs

Nutrition and Dietetics, Food Engineering, Household Economy and Teaching Nutrition, Teaching Family and Consumer Sciences, Household Economy.

## DEPARTMENT OF AUDIOVISUAL TECHNIQUES AND MEDIA PRODUCTION

### Photography and Cameraman

#### The Purpose of The Program

The purpose of photography and cameraman: in the light of scientific methods, to train or produce staff that are capable to perform qualified services, well trained, with ethical values.

#### Practice Areas

Private and public agencies, public relations and publicity departments of all ministries in the field of public relations and advertising agencies' principal clerk and promotion offices.

#### Inter-departmental Transfer Programs

Public relations and publicity, radio and television programming, radio and television programming (UOÖLP – Howard Community College USA 1+1 ).

#### Vertical Transfer Programs

Printing and publishing, photo, photo and video, journalism, visual communication design, visual arts and visual communication design, graphic, graphic arts and graphic design, public relations and advertising, communication ,communication sciences, communication arts, communication design, radio and television, design, graphic radio, cinema and television, Television Reporting and Programming.

### Printing and Publishing Technologies

#### The Purpose of The Program

In the implementations in the print sector, people with high skill in both theory and practice/ manual skills are being trained. Printing with the pre-design studies, examination techniques, a judge, following the technology sector, which is required to train qualified staff.

#### Practice Areas

Pre-print (graphic design), enterprises engaged in manufacturing printing and after printing, magazines, newspapers, agency, packaging companies, public presses, private presses, print media supplier businesses.

#### Inter-departmental Transfer Programs

Graphic Design.

#### Vertical Transfer Programs

printing and publishing , photo , photo and video, journalism , visual communication design, visual arts and visual communication design, graphic, graphic arts ve graphic design, public relations and advertising, communication, communication sciences, communication art, communication design, teacher of printing, media and communications, Advertising design and communications, advertising and public relations.

### **Radio and Television Programming**

#### **The Purpose of The Program**

Especially at the beginning of the mass media and electronic mass circulation media for the Radio and Television Broadcasting and Production aims to educate qualified personnel.

#### **Practice Areas**

Official and Private Radio Organizations, Radio and Television Program Production, Public Relations and Advertising Agencies.

#### **Inter-departmental Transfer Programs**

Photography and Cameraman, Public Relations and Publicity, Radio and Television Programming (UOÖLP - Howard Community College, ABD 1+1).

#### **Vertical Transfer Programs**

News and Media, Photography and Video, Journalism, Visual Communication Design, Visual Arts and Visual Communication Design, Communication, Communication Studies, Communication Arts, Communication Design, Communication and Design, Media and Communications, Media and Communication Systems, Radio and Television, Radio, Cinema and Television, Film and Television, Television Reporting and Programming.

### **Radio and Television Programming**

#### **Dual Diploma Programs (1+1)**

#### **(UOÖLP-Howard Community College/ABD)**

#### **The Purpose of The Program**

Students who choose 2 year programme of Radio and Television Programming (English) at İstanbul Aydın University Anadolu BİL Vocational School, will be receiving both Anadolu BİL Vocational High School and Howard Community College (HCC) diplomas if they succeed. This program will provide a year of education at the campus of Howard Community College, located in the U.S. state of Maryland, creating a great education opportunity, culture, social life, as well as recognition of success in their professional life.

#### **Practice Areas**

Graduates who want to make the transition directly to professional life will have been enriched with the skills to find a suitable job both in Turkey and other countries. Furthermore, they will have a competitive edge with the help of their international education experience and their having a degree in the U.S.

#### **Inter-departmental Transfer Programs**

Photography and Cameraman, Public Relations and Presentation, Radio and Television Programming.

#### **Vertical Transfer Programs**

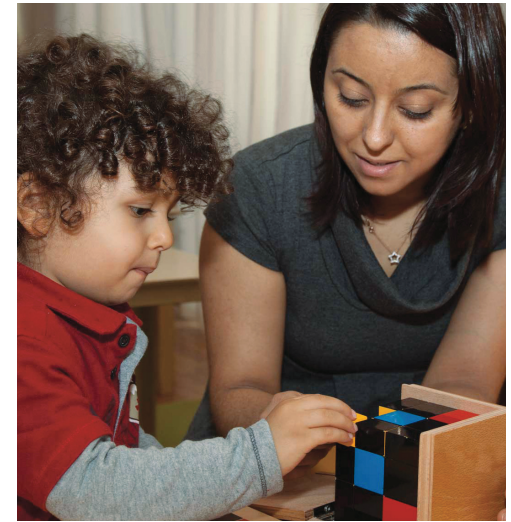

News and Media, Photography and Video, Journalism, Visual Communication Design, Visual Arts and Visual Communication Design, Communication, Communication Studies, Communication Arts, Communication Design, Communication and Design, Media and Communications, Media and Communication Systems, Radio and Television, Radio, Cinema and Television, Cinema and Television, Television Reporting and Programming.

### **DEPARTMENT OF NURSING AND CARING SERVICES**

#### **Child Development**

#### **The Purpose of The Program**

Children comprehend information directly by effective learning system. This configuration is provided by the effective learning system that is given to the child. These effective learning environments can be made possible in qualified, well-organized and planned institutions. The most important factor for an institution to be qualified is its instructors. Our common aim as child development programme is to train up our students as qualified staff who will make a difference in the sector with his knowledge and outfit. Besides the academic knowledge our students gain, our lessons are taught practically and theoretically by using modern education methods.

#### **Practice Areas**

They can work in day nurseries, nursery schools, kindergartens, nursery classes, in children's playrooms at child clinics, in the foundations and associations, in the field of child publishing, in the special training for early childhood period and also in the child's playgrounds of the tourism and sports centers.

#### **Inter-departmental Transfer Programs**

There cannot be any interdepartmental transfer in this program.

#### **Vertical Transfer Programs**

Preschool teaching.

## DEPARTMENT OF ARCHITECTURE AND URBAN PLANNING

### Architectural Restoration

#### The Purpose of The Program

Due to the increase in restoration activities in our country in recent years, our graduate, as they are well equipped with regards to this field, have no difficulty in finding a job or standing on their own two feet, as it were.

Applying the academic approach to the construction of the archaeological documentation of the residue, identification of problems and opportunities, determining methods of intervention in the national and international circumstances within the framework of a globalized world, has made the training of qualified technical staff a necessity in our age and time. Istanbul Aydin University under the umbrella of the Anatolian Vocational High School is rendering Architectural restoration program solely with this purpose in mind. Restoring cultural wealth in our youths, coupled with equipped teaching staff, up to date curriculum, internships, summer and fall, makes the transfer of cultural assets to the future generation possible. From the moment the youths start learning, our lesson programs are furnished with knowledge which are directed toward protecting and preserving cultural wealth. VOCATIONAL  
SCHOOL OF  
HEALTH SERVICES

## **VOCATIONAL SCHOOL OF HEALTH SERVICES**

**Mouth and Teeth Health | Anesthesia | Denture Technology |  
Physiotherapy | Optician | Radiotherapy | Medical Imaging Techniques |  
Medical Laboratory Techniques**

Today, the need for qualified assistant health services personnel is increasing rapidly due to the growing health sector in our country. In the field of health services, as we see globally, there is an increasing demand for manpower in government and private health institutes in our country.

Especially in our country, the reforms in the health sector, the assistant health personnel need is vital and very important for our new health policies. In order to have an effective health services, the assistant health personnel is crucial for the society. In order to reach this goal, our Vocational School of Health Services provides all the necessary knowledge and equipment to the assistant health services personnel.

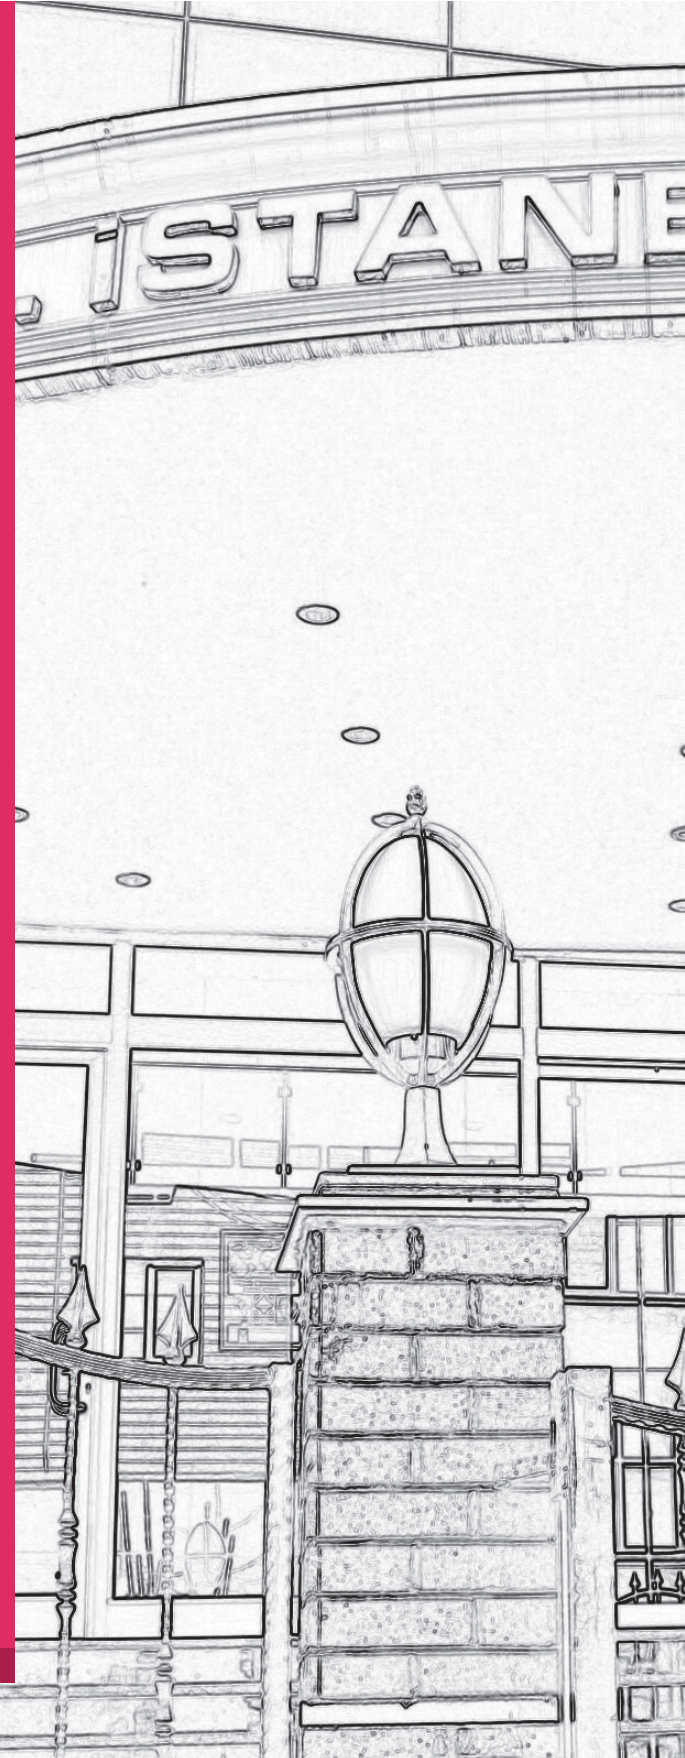

Fully aware of the expectations of the sector and the level of quality required to have a healthy society, our university leads the way to educate students who are modern, scientific, technological, socially aware, investigative, human and ethic, and equipped with international knowledge.

**Prof. Dr. Candan VARLIK**

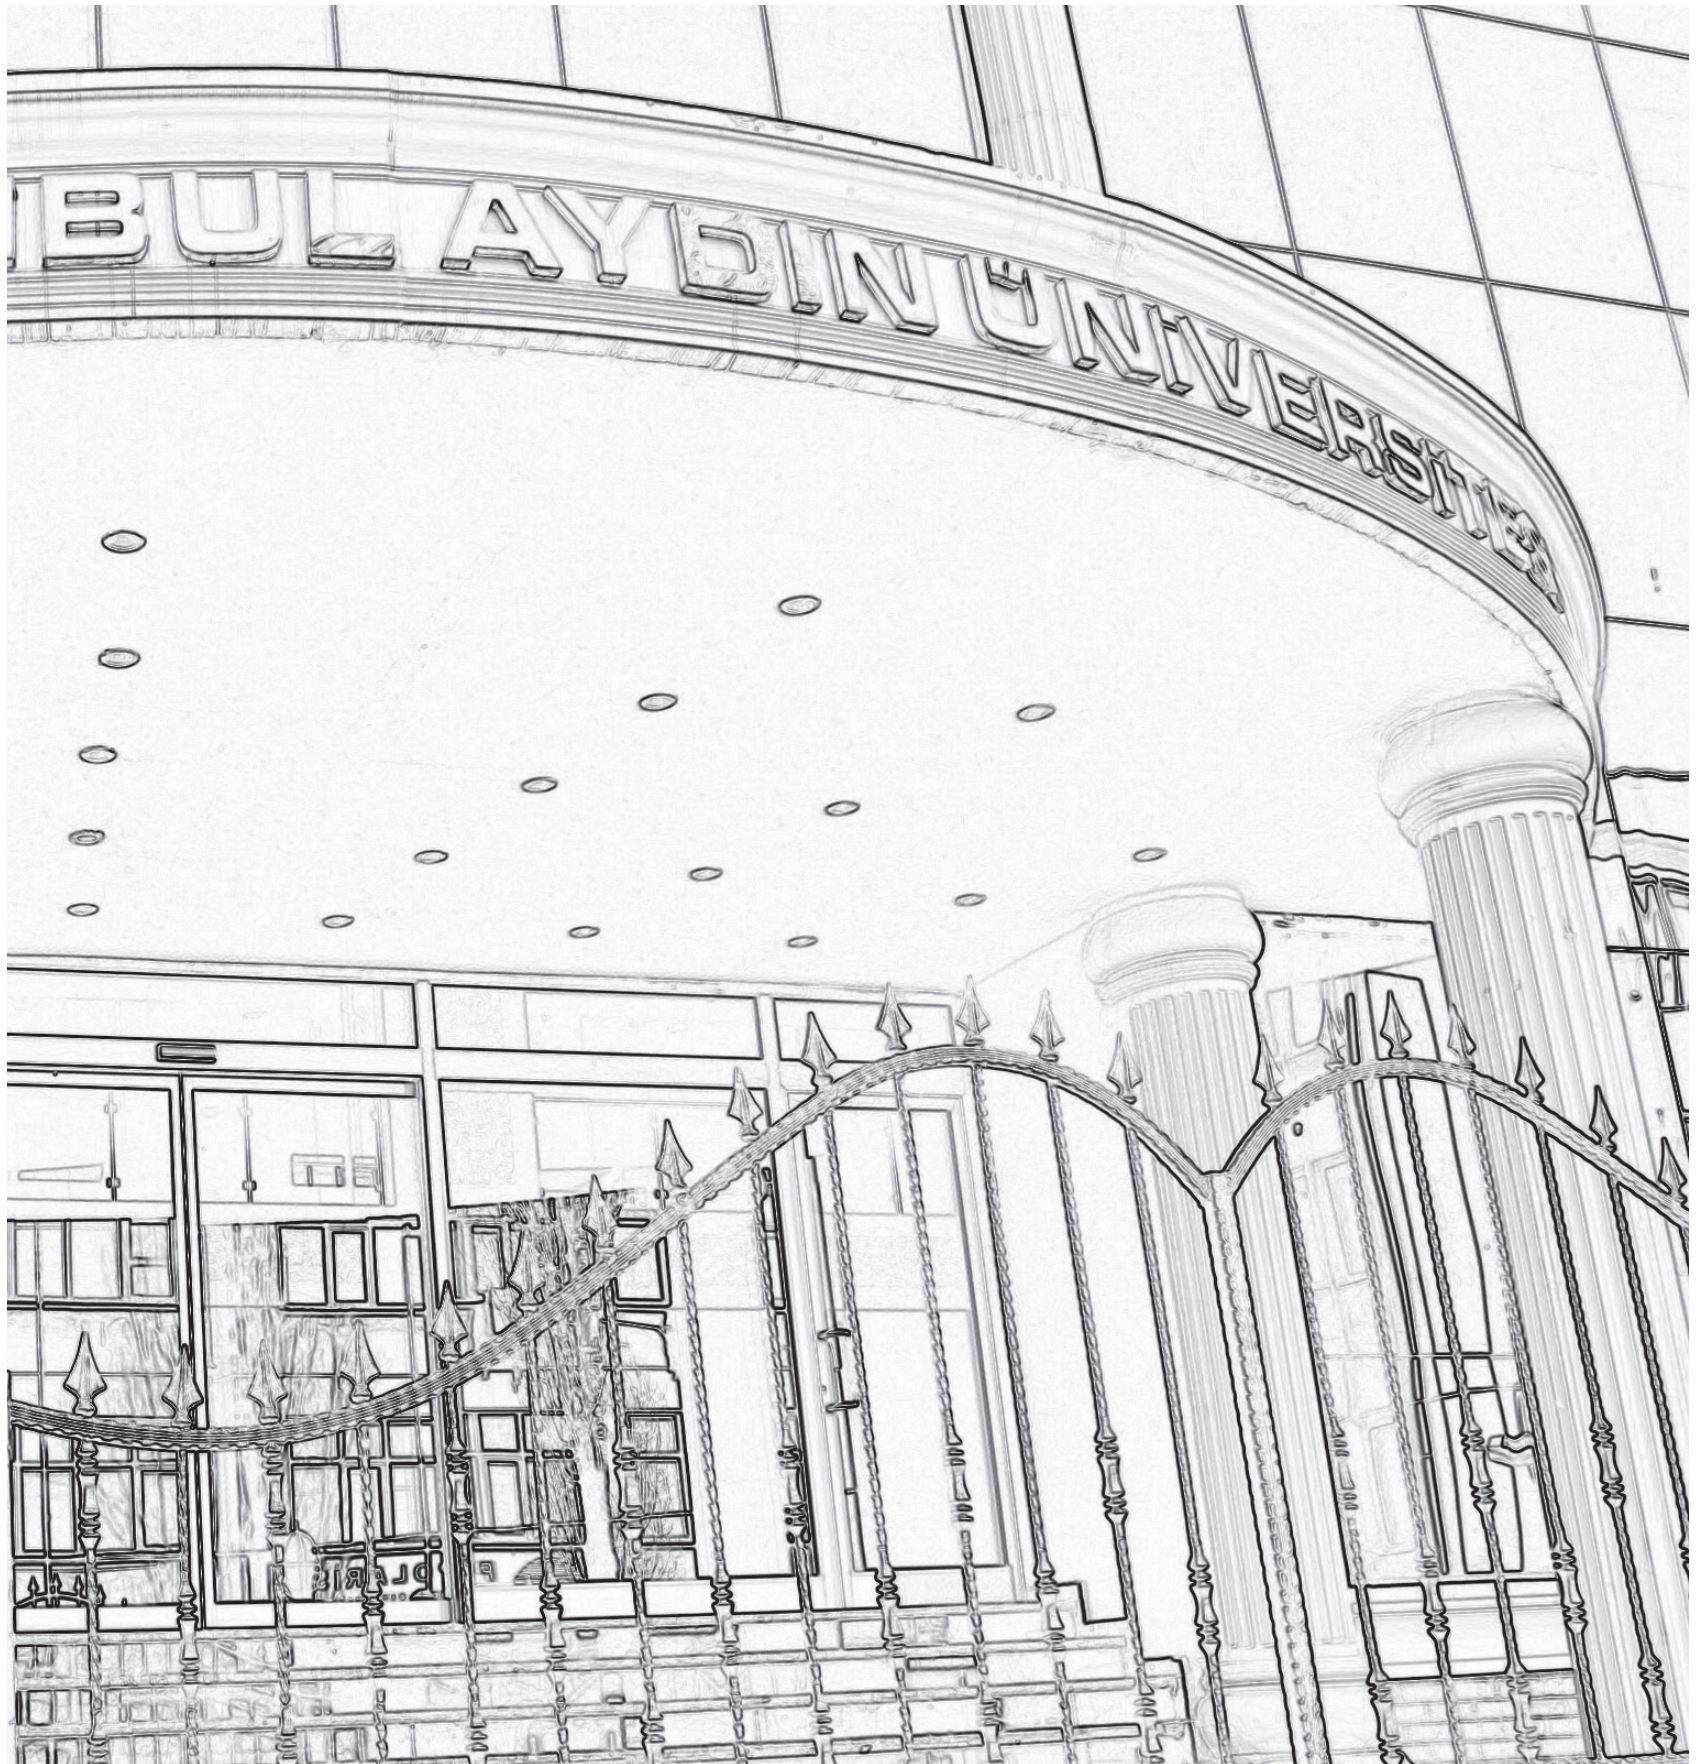

Manager of Vocational School of Health Services
